Anti-Confederation in England.

MR. HOWE'S UTTERANCES IN THE CANADIAN HOUSE OF COMMONS—A REPLY BY THE PRINCIPAL ORATOR OF THE ENGLISH CONSERVATIVE PARTY.

The London Standard says: We see by the Canadian papers that the first session of the first Parliament of the Dominion has been adjourned for a few months, after having got through the amount of legislation rendered indispensable by the present circumstances of the country. The principal subjects of debate—the Intercolonial Railway, the proposed annexation of the North-West territory, the alteration of the tariff &c.—all have an interest for the English public inasmuch as the two first involve the raising of a considerable loan by the Dominion on the guarantee of the Imperial Government; and in regard to the arrangement of the tariff, it is just possible that a portion of our mercantile community may look for the result with some anxiety. In the meantime, say that on the whole, the discussions which have taken place on the above and other questions of minor interest have brought the new Legislature into notice as a body of able and eloquent national advocates, whose performances, indeed, we must admit, would do no discredit to any deliberative assembly in any country. Each of the Provinces has contributed its proportion of eloquent representatives—men apparently well fitted to sustain their respective respective countries, and to reflect honor upon the Confederation. It is to be observed that while nearly the whole of the members from Ontario, Quebec, and New Brunswick, who have taken part in the debates have dwelt in glowing language on the benefits to accrue from Confederation, the representatives from Nova Scotia, and the solitary exception—that of the Hon. Dr. Tupper—have, on the contrary, denounced both the scheme itself, and particularly the mode in which, as they assert, it was carried in their Province by the Government then in power. A few of these anti-Confederates are willing to give the new state of political existence a fair trial, and will offer no practical opposition in Parliament; but it is to be regretted that by far the greater number refuse to accept the actual condition of things, and have expressed implacable hostility to the union.

Hon. Mr. Howe, the most prominent statesman as well as the most eloquent speaker from that Province, whose reputation stands high in these respects, has in the House of Representatives of the United States, it appears, has seized every opportunity for animadverting in his measured terms upon the manner in which the union has been effected, and in which the country have been robbed of their constitution by a mere clique of politicians in Nova Scotia. Nor does he avoid, when possible, hurling his accusations against the Government and people of Great Britain. It is very evident that Mr. Howe, from some cause or other, is a disappointed man. It is, of course, quite a matter of indifference to the people of this country, whether any dissatisfied or disappointed colonial statesman may say with regard to them. It is, however, of consequence to himself, and his reputation that his statements should contain some elements of truthfulness, otherwise they must tend to delude the more ignorant and excited portions of the community, and give to the belief that England really desires to get rid, with as little delay as possible, of her Transatlantic dependencies. Mr. Howe takes special care to point out the wrongs of his countrymen and the House of Commons of Canada with the idea that colonists, no matter what their position in their own country or the distance of the country, are most with little or no consideration in the mother country, and are, indeed, looked down upon as "mere colonists" by all classes of society in Great Britain and Ireland. That such charges are entirely unfounded we need hardly say; for their falsity, we have only to point to the recent reception of the delegates from British North America in England, where, during the several months of their stay, while employed in maturing the Confederation with Her Majesty's Government, simply the same honor was done to the recognized representative element of that part of the empire, they received a cordial greeting from the nobility and gentry of England, were entertained at the residence of the chief magistrate of the city of London, and wherever they went their presence was hailed with the same interest in all classes of our people, who were desirous of thus evincing their interest in the colonies and their recognition of their colonial fellow-subjects.

In one remark in his speech on the topic of "The North-West Territories," Mr. Howe was singularly in error. He said: "Talk to a Scotchman, a Lowlander, a Highlander, or an Irishman, of the Hon. Macdonalds and the Hon. Macnabes, for they are in his opinion only colonists." "The same feeling," he continued, "exists in England. They forget that our ancestors helped to make their country what it is—that they fought the old battles and cultivated the old soil."

Now, it was an easy task to refute such assertions as these, and to show that during the past few years—in fact, ever since the Canadian rebellion—the people of this country, as well as successive Governments, have continued to exhibit an increasing interest in the affairs of British North America, while Her Majesty's Government, in a large number of instances, to bestow marks of distinction upon colonists who have from time to time advanced the material interests of their country.

An editor up West, who has served four days on a jury last week, says so full of the law that it is hard to keep him from cheating somebody.

Guffy said he'd rather die in a railroad smash up than a steamboat one, for this reason: "If you get off and make up your mind you is but if you get blown up on a boat what is it?"

Before and after.—Old Snaggs says: Women before marriage want a thing but husband, and when they get them they want everything else.

"My lad," said a schoolmaster, "what is a member of Parliament?" "A member of Parliament is a fellow who sits in a room, agreeing with himself, and is governed by six dollars a day, understood."

Daily Intelligencer.

BELLEVILLE, MONDAY, MARCH 2.

FROM ST. CATHARINES.

(By Special Telegraph to the Daily Intelligencer.)

RAILWAY ACCIDENT.

ST. CATHARINES, March 2.—On Saturday night about eleven o'clock, a freight train from Clifton, lost five freight and a driver's car from the rear of the train at St. Catharines, by the draw bars coming out. A freight train following up, collided with the detached cars, smashing the engine and cars into fragments. The engine driver, John Davis, was so badly injured that he died early next morning. He resided in London and leaves a wife and four children. The debris of the wrecked cars shortly after the collision, took place, and were consumed. A construction train arrived from Hamilton about two hours after the accident, and cleared the track.

ANOTHER SNOW STORM.

RAILWAYS BLOCKADED.

By Special Telegraph to the Daily Intelligencer.

HAMILTON, March 2.

A snow storm set in here yesterday afternoon and is still raging, blowing from the north-east. The accommodation train started east from London, but is detained by snow between Ingersoll and Woodstock. The morning express east and west from here are cancelled.

CLIFTON, March 2.

A severe snow storm prevails here. About 25 feet of snow on the level, with heavy drifts on the highways and railways. The New York Central have cancelled the principal through trains. No present prospect of the storm subsiding.

COMMERCIAL BILLS.—We have pleasure in announcing that today the Bills of the Commercial Bank are taken up at par.

CHANCERY SITTINGS.—The Spring Sittings of the Court of Chancery for Belleville Circuit, will commence on Tuesday, the 12th of May, Vice-Chancellor Sprague presiding.

LATEST NEWS.—A special telegram from Montreal this afternoon states that no train left Montreal this morning. The snow storm was heavy in the east also. The morning express left Toronto at the usual time, but got blocked up at Scarborough and was cancelled.

CHOLERA IN BUENOS AYRES.—The following is an extract from a letter from Buenos Ayres, dated 11th January: "We are in the midst of horrors. Death is all around us. In 30 days the mortality has been 9,108, mostly from cholera. At least 60,000 out of a population of 200,000 have fled the city, so you may judge of the proportionate mortality. The disease has spread over the whole country; not a village has escaped, and it is now more fatal in the country than here. Business is completely at a standstill; neither buyers nor sellers care to make transactions."

WHAT WOULD HAVE BEEN THROUGHT.—The St. Catharines Journal says: "The City Council of Buffalo have voted \$1,000 in aid of the falling fortunes of a scurrilous newspaper published there, called the Pension Volunteer." What would have been thought if, during the late Southern war, the corporation of Toronto and in a similar manner, officially recognized the Abolitionists? And yet, it would not have been, in a moral view, such a glaring violation of international law as the action of the Buffalo Council. We wonder John Bright, Lord Hobart, or the other members of the House of Commons, the conduct of the Buffalo City Fathers, something to be commended, as furnishing to them unmistakable evidence of the good feeling which exists amongst Americans towards Great Britain."

THE MAILS.—The Globe of Saturday says: "Yesterday morning two hundred bags of mail matter, being the accumulation at the post office here for points east on the Grand Trunk since Monday last, left by the first train on that road. The load required two cars to hold it, and an extra staff equal to double the number of mail conductors that usually accompany each train." As 3 o'clock yesterday morning the first train on the Grand Trunk since Sunday morning, reached here followed by two others, which had also become snowed up on the road. The three trains contained nearly four hundred passengers, some of whom had been on the cars about a week. The mail conductors who went east with the first train, only returning to this city by these trains, having taken the entire time to reach Nanpan and return. The mails were received and despatched from the post office here yesterday, with something approaching to regularity.

Another Storm.

Old Boreas is having a "kiting" time of it. He was so glad at the success of the exhibition given last week that he has determined to give us another touch of his skill and power, and if there was any doubt before as to his meriting the appellation of the "god of storms," the "blow" to-day will effectually settle that point. It commenced snowing and blowing about two o'clock this morning, and although not much snow has fallen, the wind, which at times almost reached a hurricane, and a regular nor-easter at that, with the mercury below zero, and the snow making huge drifts at exposed points and blocking up the roads, has made it decidedly the most uncomfortable day of this stormy winter. "A blow, and it snowed, and it froze," and it was useless to cry out, "cease, rude Boreas, blustering rascal!" he only blustered and railed the more. The consequence is, the railways are blocked up, and the prospect is that we will again be without mails from the West for some days. The trains on the Grand Trunk from Toronto have been cancelled, until the storm ceases, and it will be seen by our special despatches that the same course has been taken on the Great Western and New York Central Roads. The storm was so severe in Picton that the mail stage from that town did not leave this morning. At the present time the storm shows some signs of abatement.

Impeachment.

The impeachment of President Johnson for what is termed a violation of the Tenure of Office Bill, has given ample scope to the Republican press to herald all the bad or supposed bad traits of the President to the world. The Tribune thus summarizes the offences of which he has been guilty, and for which he should be impeached:—

"We were this (the dismissal of Stanton) the first step in the President's career of official crimes and usurpations, Congress and the country would have regarded it with infinite forbearance. But designed the climax of a long series of offences and crimes which he calls his 'policy,' he can claim no such forbearance. It was up to test the constitutionality of any law that he believed from the outset the Act of Congress forbidding the appointment of rebels like John Humphreys and Gov. Stanley to office. He did it as a clear violation of the law, because he thought the law unwise, and Congress overlooked his offence. His usurpation of the legislative powers of Congress relative to reconstruction was a serious political crime, but Congress was too weak to punish him. His known familiarity with all questions of constitutional law, his abuse of the pardoning power by allowing rebels to take office, and about by harlots, and his abuse of the appointing power by levying contributions on his office holders, have been the most distinguished of his crimes. His use of the whole patronage and power of the Government as a grand corruption fund, to bribe his political enemies into the betrayal of the very principles and party he was himself elected to sustain, revealed a depth of perfidy and ingratitude a war of the history of public men in America. His complicity with the rebels and traitors in their anti-segregation at Memphis and New Orleans rendered him morally responsible for scores of innocent lives, and showed him capable of doing as much as the traitors in a war of races. His drunkenness when taking the inaugural oath, and when swinging around the pole, condemning him to the same level as yet was treated with apparent forbearance. His treachery to his oath and constitutional duty in deliberately striking down the most distinguished heroes of the war, and our most trusted civil officers, for their fidelity to the laws and their devotion to the Union, was a crime of the most prompt impeachment, conviction and removal months ago, but Congress forebore and condoned the crime."

What a character for the chief magistrate of a great nation. It must, however, be borne in mind that the writer is a political opponent and desires the success of his own party at the coming election.

As the mode by which the impeachment of a President is effected may be interesting, we give the procedure, as follows:—

"A Committee appointed by the House will appear before the Senate, and will officially announce the resolution of impeachment. The President of the Senate will appoint a Select Committee to hear the report of the Committee of the House. A report will then be made by the Senate Committee to the Senate. The Senate will take action, and its action will be officially communicated to the House. The Speaker will appoint a Board of Managers to conduct the impeachment. They will carry to the Senate the articles of impeachment. The action of the House will be read to the Senate, which will then decide when it will 'resolve itself into a Court of Impeachment.' Each Senator takes the oath of office, and the trial begins. The Board of Managers of the House presents the articles of impeachment, fixing the date and time for the trial. The trial is held before the return thereof. The day of the trial having arrived, the House, resolving itself into a Court of Impeachment, sends a body to the Senate Chamber, and is admitted. The return is read by the Secretary of the Senate, and the trial begins. The trial is held before the return thereof. The day of the trial having arrived, the House, resolving itself into a Court of Impeachment, sends a body to the Senate Chamber, and is admitted. The return is read by the Secretary of the Senate, and the trial begins. The trial is held before the return thereof. JAMES W. CARMAN, American, Consul, Belleville.
BAITON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 33, Consolidated Statutes of Canada, for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession.) A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and at crushing at W. & T. O'Leary's mill of four and one-half tons of rock, gave a yield of over 500 dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—52 rods.

The territory is admirably situated for mining purposes, being a high ridge covered with indications of mineral veins. There is no prospecting, and the fully as promising as the one on which the shaft has been sunk, and which would unquestionably yield as well. The large quantity of land, and the prospects of other gold-bearing veins, it is certain that the Company will be able to subdivide the property as soon as a little further development has been made, and form other Companies at great advantage. Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the proprietary of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz miner now in this country.

It is intended to have a further crushing in a few days, and negotiations are in progress which, if carried out, will secure a mill to the Company at once, so that regular work will be gone on with without delay, and dividends may, in that case, be expected in a short time.

Belleville.

CAUTION.

THE perfection and cheapness of the AMERICAN WATCH have given it such a wide world-wide sale, that it is now being imitated by cheap and shoddy makers. It is therefore necessary to state that the genuine watches are made in the United States, and are sold by the American Watch Co. in all the principal cities of the world. The watches are made of the finest materials, and are of the highest quality. The American Watch Co. is the only manufacturer of watches in the United States, and is the only one that can guarantee the quality of its watches. The watches are made in the United States, and are sold by the American Watch Co. in all the principal cities of the world. The watches are made of the finest materials, and are of the highest quality. The American Watch Co. is the only manufacturer of watches in the United States, and is the only one that can guarantee the quality of its watches.

The following are the trade marks on the several grades of our manufacture:

No. 259

"A Fool and his money."

AN OIL PRINCE IN BANKRUPTCY.
(From the Pittsburgh Leader.)
John W. Steel

"Johnny" Steel, somewhat distinguished as an "oil prince," having for a considerable length of time enjoyed the princely income of \$3,000 per day, filed, in the United States district court last week, a voluntary petition of bankruptcy. Many of our readers will remember his romantic exploits in the oil published some time ago, during which he is reported to have spent

hundred thousand dollars. After having "sowed his wild oats," and losing his farm, he found himself in rather straitened circumstances, and was recently compelled

to earn a living by driving an oil team. His indebtedness, as set forth in his petition amounts to over \$100,000.

Steel is a Pennsylvanian by birth, and now in the neighborhood of 30 years of age.

years of age. He has had but little education, has no business qualifications, shrewdness, and seems especially cut out by Dame Nature to attest the truth of the

proverb that "a fool and his money soon parted." Of his early youth we know very little; manhood and riches sprang upon him about the same time. His interest in the famous Mullinook farm—

by his father, for a number of years yielded him \$3,000 per day. This princely income was the means of awakening in "John

an ambition to seek other fields and source of amusement than those offered in the wilds of Venango. We heard of him first by his lavish waste of wealth in Philadelphia. Here he made the acquaintance

Messrs. Skiff & Gaylord, of minstrel fan and one of his first rash purchases was entire new outfit for the minstrels, composed of velvet coats and vests and plaid trows.

(many readers will remember the trou in this uniform). To those eccentric costumes he added diamond breast-pins of the first water, and a new suit of clothes for each member for the street. Several m

Another of "Johnny's" eccentric acts

Philadelphia is related as follows: "Walking along Chestnut street one day with friend, he espied a beautiful span of horses attached to a splendid carriage, just turning down from Second Street. The driver

envy; so, hailing the driver, Sam M—, who as it happened, was also the owner, "Johnny" coolly asked him if he would sell the establishment. Sam looked credulously

his customer, wondering whether he was drunk or crazy, when Johnny again put forward the question, "What will you take for the whole rig?" Sam, with a wink, a whole bunch of other things from his

doubtless thinking to frighten his unknown questioner, replied, "Well, I guess about \$7,000 will take the lot." Johnny answered by laying down seven one thousand d

lar bills on the seat of the vehicle, and taking hold of the reins, coolly said, "he out," and "hop out" Sam did, while Johnny drove off, leaving Sam standing unbalanced on the corner. The day

amazement on the corner. The day was spent in riding about the city and spending money lavishly; towards evening he employed a man to drive, and finally, when winding up the day he reached the Gira-

House. Alighting on the pavement, asked the driver as to his circumstance and learning that he knew "the grip poverty," Johnny made him a present of the savings and horses, telling the driver

While in Philadelphia one of the eccentricities of his morning walks on Market Walnut streets was to watch for a man wi

a shabby hat. He would then follow him until he got in front of a hat store, and then, with a swoop, he would land the offending hat into the middle of the street.

"Johnny" never carried any baggage

with him while travelling, purchasing everything as he required it. Having resolved to stop at the Continental hotel instead of his usual retreat—the Girard-

he was driven there in company with his friend, Mr. Wm. B——y, a noted merchant of our own city. Sauntering up to the office, he made known his desire to "stop awhile." The clerk asked him as to the

whereabouts of his baggage; "Johnny replied that he had none. "Then," said the clerk, "you must pay in advance; that is our rule." "Johnny" cast a glance at him, and wondering that he was not

known. So, winking at his friend B., he asked the clerk if the proprietor was in. Receiving a reply in the affirmative, the landlord soon made his appearance, where

J. S.—“You are the proprietor, I believe
—the responsible man?”

Mr. K.—"Well, sir."

Mr. K.—“About \$8,000.”

18

J. S.—"I'll take it 24 hours, anyhow, and see how it goes."

Johnny then counted out the money, and turning to his friend, says: "Now, Bill, jump in and play check."

That is the first and only experience in hotel keeping.

There are many anecdotes related about him, but the above will suffice to show the general character of the man. When, more recently, the avalanche of money had exhausted itself, we hear of "Johnny" acting in the capacity of "door keeper" for the house and the diamond pins and costumes.

A Church Made Out of Rags.

There is a church which contains near one thousand persons. It is circular within and octagonal without. The relieving outside and the statues within, the roof, the ceiling, the Corinthian capitals, are all of paper mache, rendered waterproof by saturation in oil, and the interior is of white paper. We have not reached this audacity in our use of paper; but it should hardly surprise us, inasmuch as we employ the same material in private houses, in steamboats and in some public buildings, instead of carved decorations and plaster ornaments.

When Frederick II. of Prussia set up a limited paper mache manufactory at Berlin in 1765, he little thought that paper mache might be used for the purpose of erecting a church. At present we old-fashioned English like stone better. But there is no saying what we may come to. It is not very long since it would have been as impossible to erect an octagonal altar with glass as to erect a pagoda with soap bubbles, yet the thing is done. When we think of a palm being sung by 1,000 voices pealing through the ceiling made of paper, and the element bound down to carry our messages with the speed of light, it would be presumptuous to say what cannot be achieved by science and art under the training of steady old time.

British North America.

(From the New York Albion.)

When we reflect that less than a score of years has passed away, since all that portion of this Northern Continent now known as the "New Dominion of Canada," possessed less than two score miles of Railway—and little more of Telegraphic wire—we are surprised rather than discouraged, by the substantial progress which on every hand is there being made in the present day. It would be exceedingly difficult to correctly estimate the aggregate gain to mankind, which these two leading agencies have so quickly effected; and when we add to these the steamship, and steam power generally; the construction of the great gateways to the whole human race, is something vast and wonderful to contemplate. Europe and America have profited alike by these great modern inventions; but undoubtedly Great Britain and the United States, with their wonderful national energy and enterprise, have profited most by these useful, as well as powerful, agencies for the rapid transit of mind and matter throughout the world. We must not, however, be misled by the superficial view of these two leading nations—next, in fact, to the old Empire of France, in a commercial point of view—comes British North America under its semi-national organization. The New Dominion already ranks second in the universal scale of ocean, tonnage; while it can boast notwithstanding its youthfulness—of not only the longest single line of railway in the world, but also of more miles of both railway and telegraph, in proportion to its population, than any nation extant, old or new.

Here, then, we have a fair beginning; but it is only a beginning. The history of British North America in the next twenty years, may, and unquestionably will, surprise the world, if the opportunity now offered of quickly creating a great and powerful commercial empire, be not foolishly thrown away.

As the offspring, and in fact, favorite remaining child of the British Empire, the virgin Dominion of the North, with its magnificent inland seas and navigable rivers; its agricultural, mineral, and forest wealth; its Atlantic and its Pacific Oceans; its hardy race of men, and its temperate climate, as it is, on what must inevitably become the great highway of nations between the old world and the new—it but judiciously managed, in we say, undoubtedly destined to exert an important influence on the future of the whole Anglo-Saxon race. But the fulfillment of these expectations must, we will candidly admit, greatly depend upon the prompt and decided action of the mother country. While the gain to the mother country—Provinces by recent commercial improvements has been immense, the lack of capital is seriously felt, and as in all new countries, this is, in fact, the chief and most embarrassing drawback or impediment. A union of the four chief Atlantic provinces has been effected, and already the Pacific Colonies, as well as the interior territories, are clamouring for annexation. But how can this be accomplished? How can this be accomplished? The act of union secured to the Dominion the capital necessary for the immediate construction of the Intercolonial Railway, and we hope that not a moment's time will be lost in carrying forward this much needed enterprise. And now for the next imperative step. In a word, if Great Britain would not lose her proud position as the leading maritime nation of the world, she must at once step boldly forward and aid in constructing not a lumbering old-side road-way, but a first-class double track railway across this continent, from British America to the Gulf of Mexico. Precious time is even now passing away. This great work should have been done under contract. What is £100,000, 000 to the great and fabulously wealthy

British nation? Simply nothing, when the importance of the work is considered. Why, then, does the British laborer, who alone will build this great international highway, even at this high estimate, more than three times over in a single year? Let British steamships, then, meet the disaffected Irishmen with a free passage to British America, and five years' profitable employment after they get there—together with a free grant of a homestead, with plenty of money for the purchase of the outfit—instead of meeting them with a detested Irish constabulary, and the time is not far distant when blessings will take the place of curses throughout that small but discontented island. If this course be promptly pursued, the nineteenth century will yet see a populous, prosperous, and powerful offspring rewarding mother Britain for her generous outlay, with an annual trade amounting to more than the original investment, besides rewarding her with a life-long sympathy and enduring bulwark of defence on this rapidly developing, yet easily moulded continent. But no time must now be lost. *Quoniam prole deficit.*

Wives and husbands are each apt to become neglectful. Many a good husband has unconsciously lost the love of his wife by inattention and carelessness. With some wives, plenty of cash and the outward show of happiness; but it is not true of all. Some wives must be loved. We have heard of an old gentleman who for fifty years of married life never left home without the kiss and "good-bye," and while his wife was a typical heaven-sent peace and prosperity had always smiled upon his efforts in life.

STOP GRUMBLING.—Get up two hours earlier in the morning, and begin to do something out of your regular profession. Mind your own business, and with you might let other people's alone. Live within your means. Sell your horses. Give away or sell your dog. Smoke your cigar through an air stove. Eat with moderation, and go to bed early. Talk less of your own peculiar gifts and virtues, and more of those of your friends and neighbors. Be careful. Fulfill your promise. Pay your debts. Be yourself all you would see in others. Be a good man, and stop grumbling.

Buffalo Fenian named Looney writes to the Express regarding the dishonesty of the Fenian organization there and the manipulators of the funds of the Brotherhood, and uses the following strong language respecting the notorious Paddy O'Day: "I have known those unfortunate men who are now pining in British dungeons if they only hope of release depend upon such men as Paddy O'Day, the miserable coward that he is, who is afraid to walk the streets after nightfall without some one to protect him, probably fearing the ghost of some of those unfortunate men whom he has entrapped during the war coming back to avenge themselves on him. This is known by hundreds in Buffalo."

Daily Intelligencer.

BELLEVIEW, TUESDAY, MARCH 3.

LONDON SOCIETY.—The February number of this popular English monthly has been received from W. C. Hewitt & Co., the Toronto agents. It is as usual replete with interesting and amusing literature, and is richly illustrated.

THE MAILS.—No trains yet, and consequently no mails. The Express left Toronto about 11 o'clock this morning, and is expected here about 6 p. m. The Express from the East left Montreal about noon to-day, got as far as Point St. Charles, and was there detained by snow drifts until 4 o'clock this afternoon, when it again moved westward. It is not expected here until to-morrow morning.

SNOW SHOE RACE, &c.—A meeting was held at Hamby's on Friday evening, February 28th, for the purpose of making arrangements for Snow Shoe and other races. The attendance was fair. Major Gillum was called to the chair, and Mr. Charles Henry, Secretary. After some discussion it was decided to have the races take place on the 15th of March, and Major Gillum, Messrs. E. R. Benjamin and F. J. Hooper were appointed to prepare the ground; Major Gillum, Messrs. D. E. K. Stewart, and Charles Henry to solicit subscriptions for prizes; Major Gillum, Judge, Captain Fox, Starter; Hon. Robert Ross, J. Brown, Esq., H. Corby, Esq., Dr. Lister, R. P. Jelliff, Esq., Thomas Evans, Esq., and F. C. Ridley, Esq., Stewards. It was then decided to have three mile race; a half mile race, for boys; a snow shoe race of one mile; a 300 yard hurdle race; a one mile race; a snow shoe hurdle race, 150 yards; 4 hurdles, 3 feet 6 inches high; a dash of 100 yards; a dash on snow shoes of 100 yards and a consolation race of half a mile, for the defeated we suppose. The first race of three miles is to be open to all Canada, for which Major Gillum has signified his intention to give a Silver Cup as a prize. The thanks of the meeting were given to the chairman, and the meeting adjourned until March 6th, to receive the report of the committee, when more definite arrangements will be made.

The Protestants in Ireland.

The Protestants of Ireland are beginning to bostir themselves. The threatened spoliation of the Protestant Church has aroused them from that lethargy which has characterized too many for some time past. And the late mode of administering the law in that land, will prove another incentive to more energetic and earnest action on the part of the people. Yesterday's cable telegrams informed us that a prominent gentleman, William Johnston, Esq., of Ballykilbeg House, Ireland, has been sentenced to imprisonment and fine for walking in procession on the 12th of July last. This procession was simply one of Protestants, without colors, or what sentimental politicians call party colors. This was an offence, it appears, in the eyes of the law, though numerous other processions had taken place upon various occasions during that and previous years, composed exclusively of Roman Catholics. The system of administering the law in Ireland, is the same as that which was attempted to be carried out in Canada, by the late Duke of Newcastle. Deputations and processions in full canonicals were received and encouraged, while those from others were refused. Not satisfied with the conviction and imprisonment of a prominent Orangeman for exercising a right inherent in every Briton, the Grand Jury has taken upon itself to denounce what it calls "party processions," but which, when reduced to practice, is understood in Ireland, to mean Protestant demonstrations. One year ago last 12th of July, the Lord Lieutenant of Ireland took it upon himself to ask in an imperative manner, this same William Johnston to prevent the assembling of a large number of Protestants upon his own property, to listen to Protestant addresses, and because he refused compliance, was threatened with the terrors of the law if any disturbance should occur. Yet, mass meetings of Fenians and conspirators were allowed to pass unnoticed, and it is only lately that Fenian funeral processions, both in England and Ireland, have been suppressed, but we have heard of no prosecutions. Yet, with all these persecutions, the Protestants of Ireland are loyal to the core.

Agitation has commenced in another shape, and all classes of Protestants are combining. The Belfast News Letter of the 6th inst. contains a full report of an important meeting of the "Central Protestant Defence Association," which was held in the Rotunda, Dublin, the day before. The Earl of Bandon occupied the chair. Among those present were the Earl of Eniskillen, the Marquis of Downshire, Sir Benjamin Lee Guinness, M. P., and other gentlemen of influential position. The names attached to the requisition of the meeting, comprised more than fifty lords, twenty honorables, forty six baronets and knights, thirty-six M. P.'s, one hundred and twenty-seven deputy lieutenants and lord-lieutenants of counties, seventeen Queens's counsel, three hundred and sixty J. P.'s, and five hundred or six hundred others, including some of the most respectable of the professional and commercial classes. The threatened disendowment of the Established Church was strongly objected to; but amongst all the points in the speeches made, the principal one was, that there should be no distinctive or exceptional legislation for Ireland, but that both Church and State matters should be legislated upon in precisely the same way, both in England and Ireland. The following resolutions were submitted to the meeting and adopted:—

"1. That at this eventful crisis, when the monarchy and the institutions which have ever been its true support in this country are openly assailed, we desire to declare our unwavering loyalty to the throne, our devoted attachment to the person of our gracious Queen, and our firm adherence to the principles of the constitution."

"2. That we deem the legislative union between England and Ireland essential to the preservation of civil and religious liberty, and to the maintenance of the rights of property in this country, and therefore we are determined to uphold it."

"3. That the Protestants of Ireland, from their social position, wealth, intelligence, and loyalty, are entitled to as ample consideration as the Catholics, in the rights of property, in the rights of Her Majesty's subjects in the realm; and we claim it as a right that in all legislation affecting their property, liberty, or religion, Ireland shall be dealt with, not as a separate country, but as an integral part of the United Kingdom."

"4. While we view with satisfaction any investigation which may lead to the increased efficiency of the Established Church for the spread of divine truth, we would regard its disendowment as a dangerous violation of the rights of property, and we would regard the provisions of the act of settlement, and an infringement of the inalienable international compact entered into by the British Government, the maintenance of that church, as an integral part of the United Kingdom of England and Ireland, was extremely recommended."

"5. That the effort made by the Roman Catholic hierarchy to obtain undue control over the education of the youth, and to impede intellectual progress, and be eminently dangerous to the best interests of the community."

"6. That the continued and persevering attacks made upon every legislative and endowment of the Established Church, and the efforts in Ireland to maintain Protestant principles on the part of Protestants of all denominations in the United Kingdom, call for combined action and support of such endowments and institutions."

Bill to Legalize Assessments.

The Bill to legalize the Assessment Rolls of the County of Hastings for certain years, is, we are informed, to be allowed to pass the House without opposition, a compromise having been entered into between the County and the Township of Thurlow, based upon the Valuation Report of 1866. By having one year to pay, without interest, by this arrangement Thurlow will be relieved of a large amount. It is well that an amicable settlement has been made, for though Thurlow may have thought itself wronged in the equalization, there was no reason nor fairness, in seeking to be relieved of all the taxes unpaid, particularly when other townships had paid their full assessment. But how is Sidney to be dealt with? Sidney's proportion of taxes was much larger than it would have been, had the assessment for that township been based upon the report of the valuator in 1866, upon the basis of the town township to pay that which was refused by another? And is one township to be relieved of a portion of her assessment simply because she rebelled, and taken from another which did not take advantage of a technicality? These are questions for the County Council to decide.

Nova Scotia Gold Fields.

"THE MINING GAZETTE" is the title of a new and neatly printed sheet from Halifax, N. S., and at the present time particularly, is a welcome addition to our exchange list. From the number before us we glean the following items:

SHERBROOKE.—The total yield for the twelve months ending 31st December, 1867, was 9,468 ozs. 15 dwts., or an increase of 3,634 ozs. 14 dwts. 16 grs. on the product for 1866. The average per man shown an equally satisfactory progress, inasmuch as the yield for 1867 represented 129 (129-422) grs. and that for 1866, 126 (126-333) grs. per diem, or an annual cash value of \$1,617.45 and \$1,642.30 respectively. The results for last month show 4,368 dwts. work, 900 tons ore raised, 550 tons crushed and an average yield of 1 oz. 3 dwts. 12 grs. per ton of 2,000 lbs. the gross gold product having been 647 ozs. 1 dwts. 6 grs. A crushing 31st of January of 100 tons from the Wellington Co.'s claims gave 394 ozs.

WINE HARBOR.—Only five areas were under development during January, 1,420 dwts. work, producing in a gold product of 38 ozs. 18 dwts. 15 grs. from 124 tons 14 dwts. of quartz out from the Provincial Co.'s mines.

OLDHAM.—17 tons from Messrs. Dowell & Friel's claims yielded 23 ozs. 4 dwts. The Colborne and Rogers claims frequently gave from 5 grs. to 8 grs. per ton in 1866 and 1867.

ISAAC'S HARBOR employed 33 men daily during last month, and produced 18 ozs. 15 dwts. of gold from 10 tons of quartz experimentally crushed.

MOOSELAND, OR OLD TANGIER.—Mr. Adams (Beneficiary Company) brought up 64 ozs. as the result of January's crushing, and is well pleased with the result. The crushing of 30 tons of quartz out from the Westlake Company's mine, weighing 234 ozs. 6 dwts. which in any other case would have created quite a sensation as the product of 18 tons of quartz and 21 days' labor, from a vein containing 6 to 8 feet of workable ore, opened and being drilled out at a depth of 10 feet.

UNTAKE.—The commissioner's returns not yet received, but we have seen and handled a fine brick from the Westlake Company's mine, weighing 234 ozs. 6 dwts. which in any other case would have created quite a sensation as the product of 18 tons of quartz and 21 days' labor, from a vein containing 6 to 8 feet of workable ore, opened and being drilled out at a depth of 10 feet.

LAURENCEVILLE.—The Werner mill, fitted to start this week. The Capel mill, fitted with Nissen's batteries, broke down after a few hours run, the quicksilver escaping too freely by the joints. The principle of having the box in two parts has been tried and abandoned in the United States, and the present (for the company as well as millwrights) costly experiment must result in re-adopting all the boxes. Recent discoveries of gold have induced the Commissioner of Mines to enlarge this district to nine times its original size.

OVERS.—Ordinary ore reduced by Colonel Stevens' flux process, at high rates, while selected rock has yielded as high as \$730 to the ton.

GOLD RIVER.—Appropos of the alluvial deposits on this river, Dr. How, of King's College, Windsor, in November last gave the following report to Mr. Sutherland, the principal proprietor of the claims: "I find the sand to give 14 dwts. 10 grs. returned gold to the ton of 2,000 lbs. sand, and I employed a method very likely to give results such as would be obtained in actual washing, or perhaps a little above these. The gold is in very fine dust. The sand is very coarse. It contains a good many fragments of slate and quartz, so that if crushed it would probably give a larger yield of gold."

QUERY.—Why have the French taken to eating horse flesh? Answer.—Because they have caught a Tartar in Louis Napoleon.

Jays must be a pleasant place for a residence. They are said to be killed there by tigers every year, 50 by crocodiles, and nearly as many by serpents.

The Montreal Gazette says that the Imperial authorities are about to erect a barracks at Hochelaga for the accommodation of two regiments of infantry, one regiment of cavalry and two batteries of artillery, at a cost of \$200,000. Ground will be broken early in the spring.

The first attempt to erect memorial crosses in honor of the men executed at the gallows, has been promptly put down by the coroner. A cross was put up in the graveyard of St. Patrick's, as the Weekly News states, the Roman Catholic inhabitants; but it was immediately pulled down and cut to pieces by a constable, while an officer and some members of the force stood by to protect him.

Telegraphic News.

BY ATLANTIC CABLE.

VIENNA, March 2.—Admiral Tegenhoffer has been appointed Commander-in-Chief of the Austrian fleet.

CONSTANTINOPLE, March 2.—Nasmy Pasha, Governor of Bagdad, has been called by the Sultan to take the place of Mehmed Rifaat Pasha, at the head of the war office. Omar Pasha has been appointed to act provisionally as Minister of War.

BERLIN, March 2.—The Zollverein Convention assembled in this city to-day. Bismarck was present, and welcomed the delegates. It is given out that the deliberations of the convention will be exclusively confined to commercial subjects.

LONDON, March 2, evening.—Mr. Disraeli has called a private meeting of the Tory members of Parliament.

DUBLIN, March 2.—The Grand Jury in County Down adopted a resolution, denouncing in strong terms, all party processions as dangerous to public peace and against law.

LISBON, March 2.—The mail steamer has arrived from South America. She left Rio Janeiro on the 9th February. Cholera is abating, but change has taken place in the ministry. The new cabinet has not yet been announced.

LONDON, March 2, 1:30 p. m.—Consols 93½ for money and account; Bonds 71 to 71½; 1 C 89½; Erie 43½.

LIVERPOOL, March 2, 1:30 p. m.—Cotton to arrive 31st at 94. Wheat market; Corn 41 3d; Oats 34 1d; Pork 7½; Lard 60 6d.

American Despatches.

BUFFALO, March 4.—Clear and cold. Thermometer at zero at 8 a. m.

BINGHAMTON, N. Y., March 2.—A fire yesterday consumed property to the amount of \$17,000.

NEW YORK, March 3.—This morning a fire broke out in Barnum & Van Amburgh's menagerie and museum on the Mercer Street side, in which were kept the animals belonging to the menagerie. The flames spread rapidly and soon extended into the theatre and menagerie. The wind was blowing a gale from the north-west, and rendered the efforts of the firemen almost useless. On the Mercer street side efforts were made to save the animals in the museum, but with little success. The giraffe tumbled down near the theatre, and thus blocked up the street. A number of other animals were rescued. A tiger was discovered leaping from a basement window on the Broadway side, and was shot by a policeman. The heat now became so intense that the side windows of the Prescott House took fire, producing great consternation among the guests. The museum property, with the exception of a few stags, birds and animals, is totally destroyed. The loss is estimated at something over \$350,000.

The Times' Washington special says: John O. Clarke, teller in the banking house of Riggs & Co., has been discovered in defalcation of over \$40,000. He made transfer of sufficient property to insure the house from loss, and was allowed to leave the city without molestation. He has been in the employ of Riggs & Co. for more than twenty years.

The Tribune's Washington special says: The Ways and Means Committee will probably make the whiskey tax 75 cents per gallon. They have decided to retain the tobacco tax.

WASHINGTON, March 3.—The situation at the War Office is unchanged. Stanton remains there day and night. He has arranged with his counsel to respond to the quo warranto when served on him, and does not expect to leave the building until the result of the trial is known.

A fearful tragedy occurred on Sunday last, in the State Lunatic Asylum at Augusta, Maine. Two of the inmates, Catharine Hurley and Mary Pease, were left alone in an apartment for a short time, and on one of the attendants returning, she found the body of the last named woman lying dead upon the floor, Miss Hurley kneeling beside it and beating the head of the deceased against the floor with terrible violence. It appeared that the two women had quarrelled and fought, when the deceased being unable to defend herself against the attacks of her adversary, who is a young and vigorous woman, had been thrown on to the floor, her head beaten out of all shape and her body lacerated in a terrible manner by the enraged maniac.

DIED.

In the village of Stratford, on Tuesday, the 18th inst., in great peace and blissful hope of eternal life, Frances M. Lee, the beloved wife of G. S. Lee, formerly of Belleville, and daughter of the late Samuel Street, Esq., of Stratford.

Though she had been unwell for some months past, there was no marked change previous to her sudden departure. The day of her death she was before dinner, washed and dressed herself—breakfasted, dined, and took tea with her family; and after sending her children to bed—she was her usual practice—seated herself in her arm-chair, and commenced reading aloud to her mother. Her voice was loud and clear, and her spirit happy and cheerful. After late conversation with her mother, she concluded slightly and lay down in her bed, saying to her, "I am bleeding." Finding that the symptoms were alarming, her mother sent her servant to the shop to call her husband. In a moment or two the blood seemed to cease flowing, and her breath was gone. Her kind mother leaned her back, and saw that all was over. Not a word—not a groan, or a sigh—not a movement of the hand or foot. She lay still in death. What an unspeakable loss to her bereaved partner and her three children! May her life be given again, and she have taken away, without them—S. Ross.

At Dublin, Ireland, on February 26th, the Very Rev. William Bernard Laidlaw, D.D., Dean of Loughlin formerly Dean of Ontario, aged 49 years.

Ticket Office for Great Western Railway, opposite the Market, Front St. Tickets issued to Milwaukee, Chicago, New Orleans, Omaha City, Nebraska Territory, Fort Riley, Kansas, Cheyenne, Denver, Colorado, and all points West. Fare received either in greenbacks or current funds.

City. R. F. DAVY, AGENT.

SPECIAL NOTICES.

R. B. R. Radway's Regulating Pills
Are composed of vegetable extracts (prepared in water), free from all inert, crude, or irritating substances. The first dose commences its work of purifying the blood, regulating the liver, cleansing the stomach and intestines, and purging from the system all morbid humors and corrupt matter. One Pill taken two hours before dinner, will create a good appetite and insure a healthy digestion.

BILE.
Bile on the stomach will be eliminated by one dose of the Pills—say from four to six in number. When the liver is in a torpid state, nothing can be better than Radway's Regulating Pills. They purify the blood, regulate the liver, cleanse the stomach and intestines, and purging from the system all morbid humors and corrupt matter. One Pill taken two hours before dinner, will create a good appetite and insure a healthy digestion.

THE AGED.
Suffer from constipation and paralysis of the bowels, and may have to use injections to keep the bowels open. Take a dose of Radway's Pills every night; in a few weeks the bowels will be regular, and the system will be in good health and strength—a regular discharge from the bowels will be secured daily.

See Dr. Radway's Almanac for 1898.—R. B. R. sold by all druggists.

1-21 242-25

MESSRS. J. N. HARRIS & CO.,

DEAR SIR:—I have made Allen's Lung Balm pretty well known in our city and country, and have all the four dozen bottles sent me in March; and I find that persons who use it, are very much pleased with it, and again for more, as it gives them satisfaction, and I recommend it in preference to any other medicine for Coughs and Colds. Please send me six dozen bottles as soon as possible.

THOMAS J. FLETCHER, Druggist.
P. S.—I sell more Allen's Lung Balm, than all other cough remedies together, and it gives general satisfaction. Sold by all Family Medicine Dealers.

For every Druggist & Son, Agents for the Dominion of Canada. 51-4w 247-4w

No. 260

Words.

ent of the Glenallan Map
with the "wordy warfare"
or worthy M. P.'s dispor
the legislative halls of Ontario
ation thually:

Words, words, words,
Where shall I flee
To be free
From this horrid clatter,
This endless smatter
Of words!

How like a second deluge they flow
From the "House," where successful candidates go,
Into the newspapers, column on column

Drivelling, stupid, lugubrious, solemn—
 One M. P. elts down, up jumps another,
 And so they maintain their eternal blather,
 Their speeches come in droves and herds,
 Made up of torrents of empty words,
 And newspaper men send reporters
 To gather this vapid meaningless air,
 And pollute the land with the nauseous stuff
 And as if that wasn't enough,
 The editors give every speech a puff,
 If it's on their side,
 And if it's not,

But woe betide
 The unlucky M. P.
 If it be
 That he
 Disagree
 With the
 Editor,
 For then comes another cloud of words,
 As murky and smutty as maggoty curds,
 And as stale
 As half-brewed ale.

You may talk of famine, plague, yellow fever
But can any of these, or all of them, ever

Compare with politicians,
Defining their positions,
With drowsy inanitions
And sickening repetitions?

If I were an editor this day, I declare,

(The old Adam's up, I had almost said, I would not torture innocent readers in the way that's done by the *Globe* and *Lead*. I'd print no man's speech, under any pretext. Unless sparkling with wit and laden with sense. A thing that has happened (though I can't

Nor where, nor by whom,) and may hap-
 again,
 I'd teach these chattering makers of laws
 To say something worth printing or hold t

The Conflict at Washington

the American Revolution. British tax without representation detached thirteen of its choicest American colonies from British crown, and culminated in the recognition as the independent republic.

the United States of America. In 1787 the States were established in the perfect Union of the federal constitution. Under this government, notwithstanding

the blot of African slavery, the country flourished as "the model republic" due to the late pro-slavery rebellion. A model of popular sovereignty, prospering economy and taxations so light as har-

to be felt, its fame extended "from rivers to the ends of the earth." The down-trodden peoples of the Old World looked Westward with longing eyes at the outpoken aspirations, while their ro-

plotted our demoralization, dissolution and destruction. With the suppression of most formidable rebellion in the history of human race we achieved something

more. In addition to the simple freedom and cheapness of our popular institutions, as proved in peace, the inherent strength in the severest trials

But where are we now ! Where are economy and cheapness of our republicanism ? How paltry appear the stamp

and tea taxes of the old British colonial regime vis-a-vis with the imposing schedule of our present internal revenue system. Six hundred millions a year in federal tax

gences, corruptions and spoliations, a startling exhibit. The charm of cheapness in our republican institutions is gone. Ours has become the most expensive government

to the people of any in the world, excepting that of the republic of Mexico, where anarchy is the normal condition of things. This scandalous conflict between President and Congress, since the end of the war

has cost the country some two or three hundred millions a year. And what is all for? On part of this radical Congress it is all for the maintenance of their power through universal negro suffrage.

and negro political ascendancy in reconstruction topsy turvy of the States. On the part of the President is a mixture of retaliation, self-conceit, offended pride and ambitious folly. O

gress sees nothing but Congress. Johnson accuses Congress of usurpations and despotic laws, while Congress impeach Johnson of "high crimes and misdemeanors." Johnson will not have Stanton

rule over him, law or no law; and Stanton—the man becoming the master—with law in his hand and the Senate at his back—persists in overruling Johnson.

Such is the demoralizing conduct, such is the costly farce at Washington which now overshadows and supercedes all the practical functions of the government. It is enough to bring the blush of shame upon

the cheek of the honest citizen at the bare recital of the facts and cause him to deplore the long interval which delays judgement from the people. Such

—Illinois has found the largest fossil nautilus on record. It is seven feet long, two feet wide, and nine inches in thickness.

The President's Salary.

BILLYARD CHAMPIONSHIP.—Melvin Devitt, McDevitt's next contestant for the world championship, played a discount game with William Wynn, of Brooklyn, N.Y., 1,000 points up, caroms, the other playing, and won in eight lumps, making 99, 103, 516, and 813—his total, 1,633 points, making the unprecedented average of 10.27. If this is to be his mode of playing, Devitt will not enjoy his laurels long. He, however, has found a match in "Jed" MacIntyre, the Montreuil, with whom he traded skill in New York a short time since, of which the Tribune says:—"Joseph Dion, of Montreal, who was defeated by Foster, took Brook and Duff's billiard cue, of this city, met him at the Casino, and after a few minutes' play and played an improvised match game, lasting 1,500 points caroms. There were no spectators present. The game began at 7 p.m. and closed at 10:45. Dion scored 1,150 by a score of 1,150. The highest run made by Dion were 79, 83, 115, 230, and 240. It was owing to the latter, that Foster's best runs were 132, 208, and 315. Dion was out of practice since his defeat by Devitt at Montreal. His playing last season had been so poor that he had received no prize from Messrs. Gossard, Foster, and E. Edwards, who were present. The last and greatest runs were made almost entirely by accident. The first was a light red ball, starting from the left hand corner of the table, and "swinging round that circle" until he reached the right hand corner mark. He then handled this cue with a steady judicious touch, a delicacy of touch both brilliant and original. Mr. Foster's playing, though fine, was not so good as the cue mark before the conclusion of the game, he returned home fatigued, and left the balls in ruinous

be relieved.

BY ATLANTIC CABLE.

—Among the dispatches received some days ago the President is the following from Mayesville, N. C.: "Will one regiment of Irish be of any service to you? Answer."

A Law Story.

A few years ago, a couple of Dutchmen, Von Vamp and Von Bones, lived on friendly terms on the high hills of Limestone. At last they fell out over a woman. Von Vamp killed Von Bones' canine companion. Bones, choosing to assume the killing to have been intentional, sued Vamp for damages. They were called in due time into court, when the defendant in the case was asked by the judge whether he killed the dog.

"To sure I kill him," said Vamp, "but let Bones prove it."

This being quite satisfactory, the plaintiff in the action was called on to answer a few questions, and among others he was asked by the judge at what amount he estimated the damages. He did not well understand the question, and so, to be a little plainer, the judge inquired what he thought the dog to be worth.

"To sure," replied Bones, "the dog was worth nothing, but since he was so mean as to kill him, he shall pay de full value of him."

How many suits have occupied the attention of courts—how many contests have engaged the time of the public, and have been waged with virulence and invective, having no more worthy defence than that of Von Vamp and Von Bones.

A teacher asked a little girl: "What country is opposite to us on the globe?"

"Don't know sir," was the answer.

"Well now," pursued the teacher, "if I were to bore a hole through the earth, and you were to go in at this end, where would you come out?"

"Out of the hole sir," replied the pupil, "with an air of triumph."

AMERICAN WATCHES.—A parliamentary return clearly disproves the assertion that American fishermen on the Canadian coast would not generally comply with the license regulations. It appears from this return that 340 craft, of an aggregate of 4,884 tons, paid the duty of 50 cents a ton in 1896, and that in 1897, although the number of vessels had decreased to 251, the tonnage had increased on the other hand to an aggregate of 14,591, on which about \$14,000 was collected.

A New York paper says that a "young lady from the country, whose only idea of the metropolitan police was gathered from the newspapers, recently came to town on a visit, and found herself at one of the crossings in Broadway. Frightened by the number, rapidity and noise of the vehicles that were passing, she stood hesitating, in great distress, when one of the gallant policemen politely stepped forward to escort her across. But no sooner had he touched her elbow, than with a piercing shriek she sprang from under his hand, cleared the crossing almost at a bound, and exclaimed in terrified accents: "O, sir! it wasn't me! Indeed, indeed, I have been doing nothing!"

American Watches.

The true value of Machinery applied to Watchmaking is not that by its use Watches are made more quickly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan, the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished pieces. The method established in every department is the reduplication of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. Every piece of finished watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed all its length, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest detail, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of watches in the Waltham Company, as there are different sizes and shapes of watches. Each grade, but every Watch that bears the famous trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED. For sale by all first-class dealers in the United States and British Provinces.

BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada,

for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in

the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession.)

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing

lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and

at a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of

over fifty-six dollars in gold. The lode is clearly defined, and evidently extends the

whole length of the property—52 rods.

The territory is admirably situated for mining purposes, being a high ridge covered

with indications of mineral veins. There are numerous places on the ridge fully as

promising as the one on which the shaft has been sunk, and which would unquestionably

yield as well. The large quantity of land, and the prospects of other gold-bearing veins,

make it certain that the Company will be able to subdivide the property as soon as a

little further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G.

SMURTH, Esq., one of the Directors, who is largely interested in the proprietary of the

mine, and who has had thirteen years' practical experience in the gold mines of California

and Nevada, and is unquestionably the most accomplished quartz miner now in this country.

It is intended to have further crusting in a few days, and negotiations are in progress

which, if carried out, will secure a mill to the Company at once, so that regular work

will be gone on with without delay, and dividends may, in that case, be expected in a

short time.

BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada,

for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in

the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession.)

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing

lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and

at a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of

over fifty-six dollars in gold. The lode is clearly defined, and evidently extends the

whole length of the property—52 rods.

The territory is admirably situated for mining purposes, being a high ridge covered

with indications of mineral veins. There are numerous places on the ridge fully as

promising as the one on which the shaft has been sunk, and which would unquestionably

yield as well. The large quantity of land, and the prospects of other gold-bearing veins,

make it certain that the Company will be able to subdivide the property as soon as a

little further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G.

the people. When the excitement was at its height, a young man named Pendergast, residing in Douglas street, got on Berwick fountain and made a speech to the mob, calling on them to go to the 'Penitentiary.' Sub-Inspector Gunn ordered his men to remove him, and sub-constable Riely, with another sub-constable, got inside the railings and arrested Pendergast. The mob closed round the fountain. Riely was knocked down, and the butt of his rifle, which was loaded, broken.

"After this several charges were made, in one of which a lad, named O'Leary, was ridden down by a mounted policeman, and his skull so fractured that he died soon afterwards. He and a man named Sullivan, who had been with him, were the only persons taken to the infirmary, but there are many more who have received injuries, principally bayonet wounds. Among the policemen wounded was Constable Cantillon, who got a deep cut over the right eye from a stone, and several constables were struck with missiles of a similar kind and bayonets. A constable named Egan was struck by a brick between the shoulders. The blow stunned him for some time. He got it while leading a charge on the mob in the North Main street, where the police were met as they were about to approach the police. A cigar divan kept by Mr. Dorney was almost demolished. The stock was knocked about and a quantity of glass broken. A search was made in most of the public-houses along the Parade in the hope of discovering some persons conspicuous among the rioters, but no arrests were made in them. As the police emerged from one public-house a large stone, weighing several pounds, was thrown from the window of a house opposite, and broke into pieces on the pavement—one part striking Sub-constable Kilcoole, and another a young woman who was standing at her own door, wounding her severely. She swooned and fell into the hall. A great many minor injuries were received by police and civilians. Towards midnight, when the streets were cleared, the utmost vigilance was observed by the patrols as to all passers-by. Almost every one was stopped, and those who failed to give a satisfactory account of themselves were placed under arrest, and lodged in the morning station, where at one o'clock this morning no less than thirty persons were in custody. The city was then perfectly tranquil."

BELLEVEILLE, THURSDAY, MARCH 5.

The Mineral Policy of the Government.

With the mesgro reports furnished by the Toronto press of the debates in the Legislature of Ontario, it is scarcely proper to form an opinion from reading what is given of the sayings and doings of that body, until the Bill upon which a debate may have arisen is before us. We can gather, however, from the remarks of the Commissioner of Crown Lands upon the mineral policy of the Government that we are not to have that liberal and comprehensive legislation which the country had a right to expect.

In moving the second reading of a Bill relating to gold and silver mines, Mr. Richards is reported to have "referred to the principal provisions of the Bill, stating that the Bill of 1864 was chiefly confined to gold mines. It was not supposed that there were other minerals, but the discoveries on the north shore of Lake Superior showed that there was a large amount of wealth there. The Government found it necessary to make some provision for the gold mining regions of the County of Hastings. The Act of 1864, instead of royalty, imposed a fee, under which parties were allowed to work the mines. This had been precisely a failure. They now proposed to substitute a miner's royalty. The Act also applied to both gold and silver mines. Regarding the miner's royalty, he was aware there was a difference of opinion—some holding that it should be put on the same footing as agricultural lands. He held, however, that there were material differences. When the miner is engaged in agriculture he expects permanent benefit to the country, but with regard to mineral lands no such advantage was looked for. They had fixed a per cent or 5 cents an acre, which was the lowest standard. It was the same as in Nova Scotia. It was also the same as in the Government. If the gold-bearing section proved richer, the Government would mention of doubling the amount of royalty in a justified manner. With regard to the minerals on the north shore, the probabilities of their being productive would be very productive. The Government did not, however, ask for more than ten per cent, and would fix the royalty at five per cent to the miner. In some countries an export duty is levied upon gold, and he saw no good reason why the Government of this country should give up its

right. In regard to the mode of working, he stated that two classes of persons were likely to be engaged in the work. There were the miner and the capitalist. The latter class would purchase considerable tracts of territory, and would be able to invest funds which the poor miner had not in his possession. They proposed to divide the territory and allow privileges to the miner's lease to allow him to prospect. They have the right to work anything he found in the claim. With regard to quartz, they proposed that no person shall be allowed to claim quartz without facing out a license. The Bill, he admitted, was not a perfect one, and only introduced at this session a new Bill would be introduced at the next session; and he would be able to obtain the experience obtained in the working of these laws. If he was in the Government at that time, he promised to introduce something more adapted to the country.

The policy here laid down will, we fear, retard rather than assist in developing the mineral resources of the country. Legislation, with too many of our statesmen, is based upon what other and older countries have done, without considering the condition and requirements of our own. Gold mining in Western Canada is in its infancy, and from what has transpired, it is evident that the same processes which have succeeded in other countries, will not answer here; therefore, the whole operations for some time must necessarily be of an experimental character, consequently expensive and unremunerative. Crushers of various kinds, and amalgamators of new and varied patterns have to be tested, in too many instances with loss to the parties experimenting; yet, not a step can be taken to test the importance of the existence of gold in paying quantities, and what is equally important, how to separate and secure it, without the miner and scientific man being met with a tax, in the shape of a license or royalty. Instead of imposing a tax upon a crusher at the beginning of operations, it would be infinitely better to subsidize every man or company who could be induced to invest money in the enterprise. In addition to an imposition of a license fee for crushing, whether gold is obtained or not, a miner is to be compelled to take out a license of \$5 for a year, not transferable, before he can commence sinking a shaft to ascertain whether the lode or vein is worth working. This is \$5 license to apply to every man employed, as the law is understood now, or to one mine, no matter how many men are employed. Unless specially provided for, we very much fear that the widest interpretation will be put upon the law, and the last fraction exacted. But the most monstrous proposition is to give the Commissioner power to fix the royalty at ten per cent. If many of the mines pay their ten per cent upon the outlay, it is as much as they will do, while others may, and no doubt will pay much better; but why ask for a power which it would not only be absurd but ruinous to the whole mining interest to attempt to enforce? The true policy of this country in dealing both with agricultural and mineral lands, should be such as to induce agriculturalists to occupy our lands, and miners to invest their capital in exploring and testing the richness of our country. Any other course is suicidal in the extreme. Does the commissioner suppose that men will invest their means in any enterprise, no matter how promising, with a prospect of having to pay 10 per cent upon the gross proceeds of their business? The supposition is monstrous. If the scheme is attempted it will drive every man out of the gold district.

We do not wish to be understood as advocating a free system in dealing with our mineral lands, but we do believe that no restrictions should be put upon the immediate development of such lands as are unfit for cultivation, and that no license or fee should be asked until it had been ascertained through an Inspector that gold or silver had been found in sufficient quantities to justify the erection of a crusher; then and not till then should government step in and demand a royalty, which should not exceed two or three per cent. When such a policy is inaugurated we may expect to see capitalists investing their means in mining, and the sooner our rulers begin to view this question in this light the sooner will it begin to derive a revenue from the mineral lands of the country.

Since the above was put in type we have been assured by the Inspector, A. CAMPBELL, Esq., who has just returned from Toronto, that the license to be granted to each miner will entitle him to a claim of 150 to 200 feet of any unworked Crown Lands, that no license will be necessary for mining on private lands, and that the proposition to charge for a license for crushing mills is abandoned, that Taverne Licenses are not to be enforced, and that he is instructed to levy but two to two and a half per cent upon the products of the crushing mills, the owners of which are to give bonds, and to receive five per cent for the collection of the royalty. By this it will be seen that the

report in the Toronto *Globe* of the debate upon this question was wrong, and is another evidence of the utter unfairness of that journal in dealing with its opponents.

The policy we advocate in the above article has, in the main, been adopted by the Ministry. When we receive a copy of the Bill, we shall make a synopsis of it for the benefit of our readers.

The Grand Trunk Railway Employees Gold Mining Company, Belleville.

This Company which has been working for the last year upon the mutual principle, held its annual meeting on Monday the 2nd inst. at the Company's office Belleville, and after deciding to organize under the general Act for Incorporating Mining and other Companies, elected the following officers:

PRESIDENT—Samuel Hamby.
SECRETARY—David Mills.
TREASURER—William Clarke.
DIRECTORS—Joseph Middlemass, and Samuel Kennedy.

The Company intend commencing operations on their property, Lots 13, and the North half of Lot number 16, in the 6th concession of Elzevir, as soon as the charter is obtained.

Ontario Legislature.

The Legislature adjourned yesterday, after His Excellency had given the Royal assent to the Bills which had passed during the session. In closing the session, His Excellency addressed the Legislature as follows:

Gentlemen of the Legislative Assembly: I thank you for your indefatigable devotion to the public interest which has engaged your attention during a session which is marked by a commendable spirit of harmony, and the almost entire absence of party spirit and political rancour.

Your legislative labors have been distinguished by a careful avoidance of all subjects withheld from our control by the Imperial Act, and it has afforded me much pleasure to be able to sanction, in Mr. Mackenzie's name, all the enactments which have been passed by you.

Prominent amongst these must be regarded the Act which provides for the free grants of land, and the homestead exemption to actual settlers. The Liberal Indemnities thus tendered to immigrants and others, it is to be hoped, will greatly conduce to the prosperity and material advancement of the Province.

While I regret to notice the unavoidable postponement of several important measures which came under your deliberation, I am nevertheless convinced that the delay was occasioned by the need of your time for the consideration of the question, prior to their receiving the sanction of the Legislature at our next meeting.

I thank you in the name of Her Majesty for the liberality with which you have provided the necessary means for carrying out the policy of the due administration of our affairs. You may rely upon my anxiety to co-operate with you in every measure which is consistent with the efficiency of the public service.

I have to congratulate you upon the prosperous condition of the revenue, which, after enabling us to provide for the maintenance of the Government, leaves a handsome balance in the Provincial chest.

In relieving you for the present from your labors, I beg to assure you that I shall not, however, neglect to keep you advised of the progress of the various measures which are now before the Legislature, and to which you will exercise, to the utmost of your power, your influence in promoting in your respective constituencies that unanimity and good feeling which has been my ardent wish to see established amongst all classes of the community, and in diffusing those hopes of lasting peace and contentment, in which I trust you will unite with me in believing that our next meeting, under Providence, be permitted to indulge.

Editorial Summary.

John C. Breckinridge has gone to the Holy Land.

—Buffalo is excited over Washington news. The Republicans of that city pledge 1000 men to support Congress. The Democrats are equally ready to support the President.

—A new machine for making iron and steel chains has lately come into operation in England. Excellent horse-shoe nails are made by clever machinery instead of by hand labor.

—It is said that the national debt of the United States having been increased by \$1,000,000 in December and twelve millions in January, will during the present month be augmented to the extent of twenty millions of dollars.

—A belief is prevalent among the Turks that the Empire is to end with the present Sultan, and the Chakman have a prophecy in circulation that Tarter ruler is to end in the Celestial Empire with the present occupant of the throne.

—One of the wonders of Wisconsin is a well of hot water, the temperature of which is said to be 195 degrees of Fahrenheit's thermometer, but as the boiling point of water in that latitude is 80 degrees, it is possible there may be some mistake about it.

—California has decided to utilize the anti-mony found in its silver mines and nitroberth disengaged. Examination of its properties shows that it is much harder than the commonest, and much more useful in the manufacture of type metal.

—A new sea monster has been discovered which far exceeds the Leviathan of the sea in size. It is described as being about forty feet in length, with a soft gelatinous body about six feet wide and surrounded by very strong armor or tentacles. A specimen of this hideous kind of fish was lately caught near Tenerife.

—A very important discovery has lately been made in Australia by Captain Cadell. He discovered a noble river on the north coast of that peninsula, which he descended, and found upon its banks a great pastoral country, also a fine haven with an area of 100 square miles. Emigration to the new territory has already commenced.

Telegraphic News.

BY ATLANTIC CABLE.

New York, March 4.—The Herald's London special cable, the following from Abyssinia: The King never leaves his camp, but if he should determine to abandon his baggage and march apparently unaccompanied, he could not be far from the truth. It was reported that he had marched to Assele to Theodore's troops. The special information afforded no information or clue to the present war plans of the King. The special correspondent of the Herald says, accompanying the expedition from Assele, dated at Assele on the 2nd of February, forwarded to London by telegraph from Assele dated on the 23rd inst.

He writes that the advance of the British army was within 15 days' march of Magdala. Gen. Napier met Kassa, the Tigre Chief, on the 20th inst. The chief made an offer of peace with the British, which was accepted. This important proceeding was followed by a grand army review, at which Kassa and other native warriors attended. Col. Merewether, of the British army, had previously treated an envoy of Kassa's, but the latter was not peace was denied. The King's troops had shot some of the British forces. The bodies were mutilated in the barbarous manner customary with the Abyssinians in war. Three British officers were missing. King Theodore was reported to be marching on the last of 20,000 soldiers, marching only three miles each day. Menelik, supplied by other chiefs, was said to have invested the royal stronghold of Magdala with 40,000 men. News had been received from the natives during the previous week at Assele.

No force was to be had for cattle beyond Assele, where the dispatches were dated, but the King's army was said to be in the neighborhood of Assele.

London, March 4.—The present condition of Ireland and the question of Irish reform are to be considered in the House of Commons on Thursday, 10th inst. The consideration of these subjects was postponed from the 23rd inst. in consequence of the resignation of Lord Derby and the suspension of Parliamentary business pending the formation of the new Ministry.

Dispatches from Anseley Bay say letters from the British captain have been received, the advanced post of the expedition, having been secretly brought in by native messengers. The letters are dated Assele, Feb. 3. They show that the prisoners are still confined in the fort at Magdala, where they are carefully guarded by their guards; though in great danger of the vengeance of the King, they were still as well treated as their condition as prisoners would permit. The letters give a good account of the King's health, and the important intelligence that the King of Shoa, a powerful tributary chief, had declared great rage against Theodore. It was believed he would turn his arms against the Abyssinian monarch on the approach of the British.

News from Lisbon shows that the popular dissatisfaction has not subsided. A dispatch from Lisbon to-day reports that an effigy of the Queen of Portugal was burned last night by a mob.

Rome, March 4.—Cardinal Antonelli is continued to be popularly regarded as the power behind the throne.

Paris, March 4.—The visit of the Prince Napoleon to Germany has no connection whatever with political affairs.

London, March 4.—An attempt was made last night, it is alleged by Fenians, to set fire to a large machine shop in this city, but it was detected by the vigilance and activity of the police. The incendiaries made use of Greek fire in their attempt.

POPPY and FRIPPERY.—Like all other really great men, George Stephenson held poppy and frillery in the greatest contempt. One day a youth desirous of securing an appointment as Engineer called upon him and flourishing a gold-headed cane, said that stick, my man, and then I will speak to you. To another extensively decorated gentleman he said, "You will excuse me, I am a plain-speaking person, and an army to see a nice-looking and rather clever young man like you, I am sure, that fine-patefaced wascals and all their trains and long dangle. If I, sir, had bothered my head with such things at your age, I should not have been where I am now."

R. F. DAVIS, AGENT.

SPECIAL NOTICES.

ALLEN'S LUNG BALM. Is warranted to cure all lung troubles. Cough, in an incredible short time. There is no remedy that can show more evidence of its merits than this BALM. You can get it at all drug stores, Canada, Atlanta, Ga., &c., &c.

Physicians having Conservative patients, and having failed to cure them, will find it to their advantage to prescribe this remedy. It has cured cases where other remedies have failed. BUT TRY THIS GREAT REMEDY. It is a sure cure for all lung troubles. Consumptive, do not despair because all the remedies that you have tried have failed. BUT TRY THIS GREAT REMEDY. It is a sure cure for all lung troubles.

Sold by all Medicine Dealers. Very DAVIS & Son, Montreal Agents for the Dominion of Canada. 3-4W. 971-4W.

IMPORTANT TESTIMONY FROM A CUSTOM-HOUSE OFFICER IN OTTAWA CITY !!

The following letter has been received by GEORGE
MORTIMER, Esq., Chemist and Druggist, Ottawa, Ont.
Ottawa, Ont.

My Dear Mortimer:- If it is of any consequence to
you I can positively state that after using for two or
three days your "Laxative Compound" and having received
the desired effect of regularity, I feel better and
cheerful. I have found that HENRI'S SERRAVALLE
and Pills have been recommended in every family
I know.
Yours truly,
JOSEPH H. LEE.

R. R. R.

The high praise emanating from people in all parts of
the world that have derived benefit from the use of
RADWAY'S READY PILLS, prove their life to con-
fidence. There is no pain or severe or unpleasant
effect of any kind in its operation. It is the RADWAY
Pills will stop the pain and arrest its progress.
Every one has heard of it. If not tried it. Let those who
have not used it, it will give it a trial. A few minutes
will prove its power of curing. Read the follow-
ing letter. Any person doubting its truthfulness can
write to the U. S. Consul at Rio. For every word
we will pay the Hurdler Doubler.
See Dr. Radway's Almanac for 1868.

Francis, Spitting of Blood, and other Wonderful Cures on the National Gazette of the
Brazilian Army.

Rio de Janeiro, June 16th 1868.

MEISTER, RICHARD C. LITTLE & CO.:
GENTLEMEN:- It is now eight years that I have
suffered from Rheumatism, and have had the best advice,
but could not be cured. I was in the hospital 105 days, and
all that time I kept bed and could do nothing, and
could not get any better. I made up my mind and left
it. And, fortunately, I was met by a friend, who recom-
mended Dr. Radway's Pills.

After taking the first dose of Relief and water, I
could breathe with ease. I continued taking two of Radway's Pills every
night, and had a refreshing sleep and water, and
was raising my chest and throat with it, and thank God,
I am perfectly well. I only took ten bottles of
Relief and three bottles of Pills. I hope that the authors
of said preparations may have a long and prosperous life.

generally. J. C. FRANCK & Co., 74d.

QUEEN
INSURANCE COMPANY
CAPITAL, - - - \$10,000,000.

FIRE AND LIFE.
LIFE DEPARTMENT.

The principles on which this Company is
founded contain all the elements required
to develop the benefits of Life Assurance, and
afford every facility to intending assureds—
One of the advantages secured by those who
insure their lives with this Company is that
the outside expenditure for Management is
absolutely restricted by the Bond of Settle-
ment to Ten per Cent. of the Net Life
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Must Largely Influence Profits
and Bonuses.

The next division of profits takes place in
1898, and all those who wish to participate in
the profits should insure at once.
M. E. BELL,
Medical Referee
May, 1897. J. C. FRANCK & Co., Agent.

GODEY'S LADY'S BOOK
For 1898.

THE CHEAPEST OF LADIES' MAGAZINES,
BECAUSE IT IS THE BEST.

THIS brilliant woman, the arbiter of fashion, the en-
courager of the noblest and most useful literature of the
day, the patron from which all other magazines derive
their life, is now published.

READING MATTER.
In this there will be an improvement. The volume
for 1898 will be set up with new designs, and of a
size that will enable us to give an additional quantity of
reading matter amounting to about twelve pages in each
number.

BEAUTIFUL STEEL PLATES.
Of these the Ladies' Book contains (formerly) 128
superior (we challenge comparison) to any published in
this country, either in color or in black.

THE LITERATURE OF THE LADY'S BOOK.
MARION HARLAND,
Authors of "Alice," "Hidden Path," "Miss Sida,"
"Nemesis," and "Marion."

who contributes to no other monthly publication, will
furnish a new novel for 1898, called "Pascia Row-
land," that will run through the year. Her stories are
always sought after, and as they are copyrighted, can
be found nowhere but in Godey's. Our former efficient
copy of writers have also been retained.

OUR FASHION PLATES.
The original double-page-fashions will be continued.
Model Costumes—The only magazine in this country
that gives these designs in the Ladies' Book.
DRAWING LESSONS—In this we are also alone.
Our new series of lessons is the only magazine in
which material prepared expressly for it appears.

Our new series of lessons is the only magazine in
which material prepared expressly for it appears.
Our new series of lessons is the only magazine in
which material prepared expressly for it appears.

GODEY'S INVALUABLE RECIPES
upon every subject.
House and Laundry.
TIDY RECIPIES.—This is a series of engravings
that no one has attempted to do before.

LADIES' FANCY WORK DEPARTMENT.—Some of the
designs in this department are printed in colors in a style
unparalleled.

Five hundred

The Maritime Provinces.

Our exchanges from the Maritime Provinces, received this morning, contain several matters of interest. The accounts of the distress among the fishermen are heart-rending in the extreme. Several have already died of starvation, and unless something more is done to relieve the necessities of the poor, there will be still greater distress. At Greenspond a man named Holloway was found dead in a house without a bed—rolled up in an old cloth; his wife was nearly dead beside him. Others in the same vicinity were on the verge of starvation when discovered. Sixty-four persons on Swain's Island were found without a morsel to eat. Relief was being extended as far as possible, but it is evident, from the accounts which reach us, that another call upon the people will have to be made. The Antigonish *Chapel* speaking of the handsome manner in which the people of Canada aided towards the distressed fishermen, administrators a well merited rebuke to the *Chronicle* and *Citizen*. It says: "We learn from the columns of the Canada papers that the most strenuous exertions are being made in every part of the Province of Canada to aid the distressed fishermen of Nova Scotia. Public meetings, concerts, private solicitations—every possible means—are being pressed into requisition, and the results are gratifying in the highest degree. It is pleasing to observe that political antagonism has not interfered to prevent the flow of Christian charity. Many a destitute family along our southern shores will have reason to be thankful to those in the land of the stranger for keeping the wolf from the door. This is as it ought to be. When children ask for bread and mothers have none to offer, nothing can be done other than supplying the wants of procuring it. It is villainy of the worst kind to mix politics with the circumstances. Let politicians fight out their own battles if they choose; but let private generosity be uncheckered by the contest."

Some two weeks ago, it was reported that the Legislature of Newfoundland had voted that that Province would stay out in the cold for a while longer. This appears to have been incorrect, for we observe by the proceedings of the Legislature that the Address on Confederation, in reply to the Speech from the Throne, and which speaks approvingly of the Governor's sentiments thereon, was carried by a vote of 16 to 10. This effectually disposes of the report that the colony is opposed to a union with Canada.

The Halifax *Express* says: "The question was asked in the House of Assembly on Saturday last, by Mr. Blanchard, whether the Hon. Mr. Howe was a delegate accredited to England—a question which the Provincial Secretary refused to answer. It is stated, we know not whether correct, that Mr. Howe has not gone home as a delegate, but that he has accepted a situation on one of the London papers at a very remunerative salary, and that he will not return to Nova Scotia."

The anti-Confederate Halifax *Citizen* thus shirkingly refers to the proceedings on Confederation in the Newfoundland Legislature: "The Newfoundland Legislature was opened on the 30th ult., and some business of importance has been transacted, the debate on the address having been a most interesting one."

A fearful snow storm occurred on the 13d of February, during which a number of lives were lost. The *Newfoundlander* says: "It appears that some thirty persons are known to have been travelling that evening between Heart's Content and Harbor Grace, and that up to yesterday thirteen dead bodies had been discovered, while there is every reason to believe that the remaining seventeen, yet unaccounted for, have met a similar sad fate. The Harbor Grace *Standard* referring to the same storm says: 'There are reports that several other persons are missing and probably dead. There were many poor creatures in town on that day soliciting charity; how they ever reached their homes is a miracle, and we very much fear that when news reaches us from the different settlements it will be found that many lives have been lost in that dreadful storm.'"

The Halifax *Reporter* says: "We have had an abundant supply of fish in the market during the past week, and large quantities have been purchased for shipment to the States. Halibut sells at 10 cents per pound."

The newspaper press of the Maritime Provinces have not given up the hope of being able to have the postage tax on newspapers abolished. They not only continue to kick against the onerous tax through their papers, but have had meetings, adopted resolutions, and appointed committees to take such steps as they deemed advisable to give effect to their views. We hope they may succeed."

One way of raising the wind in New Orleans is to establish a minestrone distillery at a cost of \$30,000, and have it introduced upon and seized. The waiter gets \$300.

Will Watson, a colored man, died in Prince George's County, Md., recently at the age of 110. Until within a few years he had been an active and skillful gardener.

B. F. Downing, of Lexington, Ky., announces himself as an independent candidate for Sheriff, and considers a claim indisputable, as he "once slept with Andrew Jackson."

Montreal Times

Daily Intelligencer.

BELLEVEILLE, SATURDAY, MARCH 7.

SUPERVISORS.—The Bureau Veritas of Paris has published a statement of the Marine disaster which occurred during the past year. The total number of vessels lost in 1887 is 3,545, an increase of 113 as compared with 1886. Of these losses nearly one-half have fallen upon England, whose contribution to the unfortunate list has been 1,435 vessels, while the United States has lost 464, France 373, Prussia 150, Norway 116, Holland 119. Of steamers lost, the number was 145, and of sailing vessels 2,900.

GOING AHEAD.—The Montreal *Gazette* speaks very hopefully of the prospects of employment for skilled and unskilled labor during the coming season. It says there will be no lack of employment in the city next spring and summer for the laboring and artisan classes as an unusually large number of buildings will be erected, and, in fact, are now being contracted for. Confidence in the great future of that city has become an article of faith with many of the capitalists, and real estate still seems to be the favorite mode of investment.

IN HURTS TRADE.—A facetious but far-seeing contemporary thus alludes to a matter interesting to trade: "Don't advertise—it is a bad plan. It will call attention to your place of business, and it is much better for people who wish to trade with you to hunt you up. It gives your customer exercise and makes them healthy. Besides, if you advertise, somebody will buy all your goods, and you will have to get more, which will be a great bother to you. Don't do it. Stewart, and Ayer, and Bonner, and Schenck, and others, never advertise. They have an idea that it injures their business."

AN INHIBITORY ASYLUM.—The Inebriate Asylum at Burlington, N. Y., is doing good service. During ten months past not less than five patients, who had been in the seasonal delirium of drunkenness, have been restored to their friends "clothed and in their right minds." Such an institution is sadly needed in this Province, and we do not think the public money could be better appropriated than in providing an institution where the unfortunate victims of intemperance could be treated with wisdom and kindness, and made to feel that they are not alone in their struggle.

GOING OFF.—The "big thaw" has evidently commenced, and the snow is going off under the combined influences of a heavy rain and a warm south wind. As yet there is no appearance of a flood but as we have already entered upon spring, and must naturally expect more rain and warm weather; it would be wisdom to make preparations against the effects of a sudden thaw. All the drains should be opened and the gutters cleared without delay. There is still an immense quantity of snow on the ground, which, if it goes off with a rush, will flood every cellar on Front Street. Be prepared in time.

Nearly a Kill.—As the omnibus was going up Bridge Street West to-day, near the residence of the Rev. S. Jones the omnibus lost its balance, falling on the driver and burying him in the snow. The driver was a state of mind capable of receiving any impression which might be made. The horses, not comprehending the situation, made violent efforts to change the state of affairs, and would have succeeded but for the presence of mind and nerve exhibited by a lady near the scene of the disaster, who seized the frightened steed by the head and held them until assistance arrived, when the driver was rescued from his perilous position, very much frightened and considerably bruised.

SEEKING ADMITTANCE.—Within the last few days the Dominion Government has received information from Vancouver's Island to the effect that the people of that Colony have expressed an inclination to join the Confederation. It will be remembered that some time in March, 1867, certain resolutions were agreed to by the Legislative Council of the colony favorable to union; but as these resolutions have not been officially communicated to the Dominion authorities, no steps have been taken to set upon their execution. However, that a public meeting was held in the colony about the end of January last, and the resolutions passed by the Legislative Council in 1867 were approved of. The Government has received official communication respecting the proceedings of the meeting relative to the matter of the admission of the colony into the Confederation has been under consideration.

A new daily paper is projected in Washington, having as one of its objects the support of Mr. McCulloch's financial theories. The Mormons are preparing to defend themselves against the enforcement of the law, and are constructing a large and strong fort near Cove Creek.

A writer in the Philadelphia *Post* says: "Looking around a fashionable church lately, I observed but two gay headed females to the congregation, and one was an English woman, the other a Canadian."

and stars have woven in their wonderful texture the secret of their creation, so that they may have a celestial chemistry as well as the chemistry of the soil. And thus it is in all the provinces of the cosmos.

But what now are we to understand by science? It is not a mere knowledge of the properties and laws of matter, nor of the connections among different departments of external nature. Science pertains to the mind; it is a mode of its activity, of its thought. It is the intellect's effort to grasp the reality of things upon subjects; it is indeed nothing less than an exalted spiritual mood, in which aspiration and reflection feed the intellect, cooperate and work onward toward this single purpose—the establishment of truth. The great school of science is undoubtedly the objective world; but the normal and intellectual tendencies it cultivates. Its supreme allegiance to truth, and the discipline enforced to attain it, have universal application, and its spirit must govern the thinking operations whenever they take the direction of inquiry. Already its influence has passed far beyond the domain of science, and it is to be limited. The whole order of questions pertaining to man and society are constantly becoming more and more scientific in their spirit and methods.

Nor does this influence stop even here; it is now beginning to be powerfully felt even in theology. The traditional authority of science, regarding man as an intrusive member interloper in the field of thought, fixing attention continually upon points of dissension, contrast, and dissension, it cultivated toward it a systematic antagonism, blindly heedless of the fact that in making out its case it sealed its own doom. In the business of science to deal with the highest proofs and work out the most certain conclusions; if, therefore, any doctrines, or actually contravene these conclusions, their rejection follows from the very laws of thought.

But this spirit is being happily outgrown. It is more and more recognized that there is a real common ground between the various classes of inquirers; that the interest of all is to find agreement, and not to seek for discord, and the establishment of the highest possible truth, which is full of the most beneficent promise. Conflict of opinion, sharp and strenuous among the votaries of science, as among religious believers, and between both classes of thinkers, is alike unavoidable and undesirable; but a vast victory is gained for humanity when a common aim is sincerely conceded, and it is felt that all genuine research can only lead up to successively higher and higher inquiries. Science and theology have still plenty of disagreements to settle; but the rancorous temper which has so long characterized the perpetration of them has greatly abated. Let us hope it may soon pass away forever.—*Methodist Times*.

RAILWAY TRAVEL.—It is our pleasing duty to be able to state to-day that notwithstanding the enormous quantity of snow that was drifted within the past few days at various points on the Grand Trunk railway, and which completely blocked the trains very much, the line is now clear and travel has been resumed. Trains will leave as usual from all stations along the entire line. This victory over the snow-drifts has not been achieved without almost superhuman effort on the part of the officials and employees of the road generally. An idea may be formed of the difficulty of forcing a passage through some of the cuttings when it is stated that the snow was found frequently higher than the coaches, and that five or six of the best engines united behind a snow-plough were unable to get through, although they were run at full speed into the snow-drifts. Gangs of men were carried along for the purpose of extricating the snow-plough when it became helpless, and then they would have to back up again for a mile or so and go thundering into the snow-drifts at full speed in order to force a passage. These repeated efforts have forced a passage, but the physical energy of the employees almost beyond further endurance, and therefore under the circumstances the travelling public have reason to be thankful for the labor that has been put in their behalf. The assistant superintendent of the western division of the road, Mr. Jas. Stephenson, has been most unremitting in his efforts to get the road clear, and the task was accomplished. This is the first time however, that the indomitable brought into requisition on behalf of the public under similar circumstances, and consequently it is to be hoped that he may long remain at his present post to look after the interests of the Grand Trunk railway and those of the public generally, impeded on these lines for a single year. We understand that travel has been resumed on the Great Western and Northern. *Toronto Leader*, March 5.

A poor woman, wife of a retired soldier, living at Nun's hill, near Valparaiso, has birth, four boys and two girls, and is a most wonderful example of the circumstances, seeking to live well under the circumstances, exhibiting a vigorous vitality. Unfortunately, of this liberal allowance to a poor family of eleven, three have died, the two girls are one of the boys.

The Girls of Cape Breton County, Nova Scotia, held a meeting on the 17th, and passed resolutions in favor of Rome, and against their member, Mr. McKenney's conduct at Ottawa was bitterly commented upon. A prominent speaker declared that it was a disgrace to allow him to go on his way to Canada at this season of the year, as the roads were bad, the weather cold, and they predicted having him under their own eyes in the town of Sydney.

An English Magazine estimates the Wall Street money loan to be \$16,000,000,000 and \$16,000,000,000 a year.

Stock Market.

The following are the quotations of the Stock Market reported in the commercial article of yesterday's Montreal *Gazette*:
The business of the week has been limited. There is, however, a better demand, and the market closes firmer.
Banc of Montreal—Has advanced to quotations, with sales at 129½, 130, and 130½.
Bank of British North America—Is asked for; none in market, 103 to 104.
City Bank—There has been considerable enquiry for this stock, which has advanced 1 per cent, with sales at 104½ to 105, and 102½.
Molson's Bank—Is firm and in demand at 111 to 113.

Merchants' Bank of Canada—Has been dealt in at 107½ and 108, closing firm and in demand at these prices.
Mechanics' Bank—Is enquired for at 97; no stock offering.
La Banque du Peuple—Is held for 100; buyers offering 104½ to 105.
La Bank Jacques Cartier—One small sale at 105. There are buyers to-day at 105½ to 106.
Quebec Bank—Offering at 100, with no buyers over 98½.
La Banque Nationale—Quotations nominal, 100 to 105.
Union Bank of Lower Canada—Buyers at 100; no stock in market.

Eastern Townships Bank—Buyers but not sellers at 99 to 100.
Ontario Bank—Has been dealt in at 97½; which is the closing price.
Bank of Toronto—Is offering at 112, with buyers at 110.
Gore Bank—Is offered at 81, without attracting attention.
Royal Canadian Bank—Buyers at 90; sellers at 91.
Canadian Bank of Commerce—Sellers at 90 to 100; No demand for this stock.

Montreal Telegraph Company—Holders at 133; buyers offering 131.
Canadian Navigation Co.—Offered at 107½; Richelieu Navigation Co.—Sellers at 100½, with buyers at 100.
Lively Stocks and Bonds—Nominal. Nothing doing.

Canada Debentures—Fives Sterling have been sold at 86½; Currency Bonds in demand at 87. Sixty day debentures have been largely sold at 100. No Sterling offering.
Mortgages—Continue to be enquired for.
Exchange—Bankers' Bills firm at 110 to 110½.
Money—There has been a large demand for money, and rates both at the Banks and on the street are rather higher, say 8 to 10, and 10 to 14 respectively.

Editorial Summary.

—A lad named Brenna fell into a boiler of hot water at Blackwell's paper mill, St. Catharines, and was scalded to death.

—St. Catharines is the Mecca of bridal parties, the hotels of the town being filled with such guests at present.

—Brimpton has been legislated into a town, but will not assume the dignity until January, 1889.

—Thirty thousand children are growing up vagabonds in New York.

—General Lorenzo Thomas has already recovered the cognomen of "Old Ad Interim" at Washington.

—The Emperor Napoleon has been ill and confined to bed, but the indisposition is not serious.

—The Dominion Telegraph Company has fixed its headquarters at Toronto, and make arrangements for 3,000 miles of wire.

—The New Brunswick Government has introduced a Homestead Law into the Legislature, to take effect from and after the first of July next.

—The Grand Trunk Company is negotiating with the Toronto Council for three additional lots with water frontage, to be used as a new site for a station.

—There are 25,000 unemployed men in Chicago, 19,000 of whom are recipients of charity.—New York, Boston, Philadelphia, and other large cities of the Union are in a similar distressed condition.

—New postage stamps will shortly be tested by the Post Office Department, to accommodate the 2 cents Provincial, and 6 cents American postage. The 15 cents stamps are already supplied for the payment of postage to England via New York.

—Charles Dickens entertained about thirty literary gentlemen of Boston and suburban cities at supper, at the Parker House, on Saturday evening. The affair was a peculiarly elegant one, the room and table being decorated in the most expensive and lavish manner with flowers.

—The vessels from George's Bank are arriving at Cape Ann with good fares principally codfish. They report halibut very scarce. The schooner David J. Adams, from the Western Bank, arrived at Gloucester on the 25th with about 20,000 lb. of halibut, which found a ready market the next day at a very high price.

—The endeavor to introduce home-fish into English diet brings out some good jokes. *Judy* represents a gentleman at dinner looking up a horse shoe from the soup tureen, and saying, "You say it's too hot! This is the second time the cook's forgotten to take the shoe off."

—The coal fields of Alabama are attracting attention. They are three in number; the Coosa, the Cahaba, and the Warrior river district, covering about 5,000 square miles, and the Warrior river district, which is said to embrace no less than 90,000 square miles. The quantity of the coal produced from the two first is very fine; the third is rather inferior and less accessible. Very little has hitherto been done in developing these districts.

—To save his face from the whisking of his cow's tail, while milking her, a milkman, N. Y., dairymen stretches a stout wire across the stable, immediately back of the cows. In the brush of the cow's tail he fastens a small iron ring. A hook upon the wire secures the innocent member out of the way of the milk. As soon as the cow is milked, the hook is removed from the ring, and the animal turned out of the stable.

Royal Black Chapter.

The Royal Black Chapter of the Grand Black Knights of Ireland met on Friday in Hamilton. There was a full representation from all parts of the Province, there being about fifty delegates present. The following officers were elected for the ensuing year:

Grand Master—Bro. Sir Knight F. H. Medical, Toronto.
Deputy Grand Master—Bro. Sir Knight J. Ross Robertson, Toronto.
Grand Treasurer—Bro. J. G. Moore, Belleville.
Grand Registrar—Bro. McAndrew, Hamilton.
Grand Lecturer—Bro. Minnie, Hamilton.

Telegraphic News.

BY ATLANTIC CABLE.

PARIS, March 6, evening.—The forthcoming Ministerial budget will press the payment of the principal and interest of the Franco-Mexican bonds.

It is said that Russia has been strongly urging upon the Western Powers a scheme for the independent union of the Danubian Principalities. London, March 6.—The prisoners who were on trial at Warwick for Fenianism—Moore, Burke, Casey and Shaw—were brought to Newgate to-day to guard against possible rescue. The prisoners were escorted by a body of twenty policemen, there were, however, no attempts at a release.

A despatch from Amstey Bay says the advance of the British expedition was awaiting at Anlo the appearance of Kassa, Prince of Tlre, who had promised to join Gen. Napier there with a large force of native troops.

LONDON, March 7, 3 p. m.—Consols 95½ for both; Bonds 7½; 1 C 89; Erie 41½.

LIVERPOOL, March 7, 3 p. m.—Cotton active; Uplands 9½ to 9½d on spot; 9½d to arrive; 10d to 10½d for Orleans. New Orleans 42½; 6d; Wheat active; Beef 114s; Pork 77s; Lard 56½d; Cheese 54s; Sugar firm; Naval Stores dull.

QUEBEC, March 7, 3 p. m.—The steamship "Cimbria" and "Wm. Penn," from New York, have arrived.

American Despatches.

WASHINGTON, March 6.—The Secretary of State to-day sent to the Senate a despatch in reply to the resolution of that body on the subject of alleged interference of our Consul in Rome in the late difficulties in Italy, and especially in the attempted invasion of the Roman States. Consul Cushman explained that he accompanied the army for the purpose of receiving reliable information; that he on his own under fire and used the gun in self defense.

The President transmitted to the Senate to-day, copies of the correspondence relating to the abduction of Allan McDonald, the British subject who was arrested in Canada on a charge of smuggling, and carried into the United States by a Sheriff from Michigan, on the 5th October last. After a long correspondence on the subject, Seward on the 17th February, addressed a letter to the British Minister, expressing the disapprobation of this government of the proceedings in the case of McDonald, and to direct that person to be set at liberty. Mr. Melton, on Feb. 20th, says he has no doubt Mr. McDonald's government will be much gratified and entirely satisfied with the contents of Seward's note, adding in conclusion: "I hope you will believe that we have no sympathy with the individual in question, who showed so great want of faith on the occasion, for the representation I made to you, was not inspired by any wish to withdraw a convicted criminal from punishment, but was merely for purposes of inviting your assistance for the prevention of any conflict between the authorities of our two countries. I therefore take upon myself the responsibility of not accepting your offer that Allan McDonald should be set at liberty in Canada, confident as I am that Her Majesty's government will approve this step at the same time, and that they will appreciate the straight-forward manner in which you have treated the matter."

PITTSBURGH, March 6.—An accident occurred on the Hamilton Railroad, by which two men were killed. The engine, which was thrown from the track, causing its total wreck.

NEW YORK, March 7.—The *Tribune's* New Orleans special says: This morning's *Times* makes a left-handed apology for the cheers which the rebel Fire Department gave General Hancock and Jeff. Davis, and says: "If this be treason, make the most of it." It is a statement prevalent among the city poor without city notes, that fears are entertained of serious trouble.

NEW YORK, March 7.—The *Herald's* Washington special says: It is probable that the House Committee will agree to General Farnsworth's Telegraph Bill, with some amendments. The Telegraph Companies have in fact, in fact, they would like a hearing. They are in favor of making the penalty for divulging the contents of a message heavier than is proposed.

The *Herald's* Havana special says: Private advices from Sinal report that the Mexican order of war "Tabasco" had arrived there with orders for Gen. Alatorre's forces to return to Vera Cruz.

The *Herald's* St. Domingo special says: A counter revolution had broken out in San Juan, Noguera, Banca, Matas and Ucerado, under the leadership of Gen. Oquendo, Moreno and Castillo. The people are very discontented with the

R. R. R.

The high praises emanating from people in all parts of the world, who direct counsel from the use of RADWAY'S RHUBARB, prove their title to confidence. There is no pain in using this medicine, and it is not in its nature to destroy the system, but to purify the blood, and to give it a new lease of life. Let those who have not used it, if it gives them a trial. Read the following letter. Any person doubting its truthfulness need only try it. It is sold at 25c. per bottle. For every bottle not true we will pay the hundred dollars!

See Dr. Radway's Almanac for 1868.

Paracetamol, Spitting of Blood, Difficult Breathing Cured.

Wonderful Cures on the National Guards of the

London Army.

No. 24 JAMESON, June 16th 1868.

NESTOR, KATHRYN C. LETTER & DAN.

Dear Sir, I have used your medicine for the last eight years that I have

suffered from Rheumatism, and have had the best effect.

I could not be cured. I was in the hospital 100 days and

all that time I paid blood and matter, but seeing that I

could not get any better, I made my mind up and left

it. And, fortunately, I was met by a friend, who recom-

mended Dr. Radway's & Co's preparation.

After taking the first dose of Relief and water, I

could breathe with ease, and I kept my pain diminishing.

I continued taking two of Radway's Pills every

night, and had a teaspoonful of Relief and water, and

raising my chest and throat with it, and, thank God,

I feel myself perfectly well. I only took ten bottles of

Relief, and have been of little use. I hope that the authors

of said preparation may have a long and prosperous

life.

QUEEN

INSURANCE COMPANY

CAPITAL, - - - \$10,000,000.

FIRE AND LIFE

LIFE DEPARTMENT.

The principles on which this Company is
founded contain all the elements required
to develop the benefits of Life Assurance, and
afford every facility to intending assured.

One of the advantages secured by those who
insure their lives with this Company is that
the outside expenditure for Management is
absolutely restricted by the Bond of Settle-
ment to Ten per Cent. of the Net Life
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Must Largely Influence Profits and Bonuses.

The next division of profits takes place in
1868, and all those who wish to participate in
the profits should insure at once.

Important to Miners and

Mining Men.

JOHN'S PATENT WATER-PROOF SAFETY FUSE
for WIND-GRAIND and SUBMINE
BLASTING, is much cheaper than any other,
and pronounced by Mining men much better
than any imported.

Testimonials received from men well
known in the mining and quarrying business
of Canada and the United States; from
Messrs. Morrill & Co., Beaumont, Yellow
Macfarland, Adams, Watson, Orillia, Veara,
and others.

All orders promptly attended to.

Address **JOHN'S & Co.,**
160-30.

BELLEVILLE, WEDNESDAY, MARCH 11.

SUNDAY SCHOOL CONCERT.—A Concert will be given by the children of No. 1 Wesleyan Sunday School, in the Church, Bridge Street, on the 15th inst. The proceeds are to be applied towards repaying the library. We trust there will be a full house.

BANK OF UPPER CANADA.—His Excellency the Governor-General in Council has been pleased to appoint Peter Howland and Charles James Campbell, both of Toronto, Esqs., to be Trustees to represent the interests of the creditors, in the 4th section of the Act of the present Session of Parliament, chapter 17, intitled: "An Act for the Settlement of the Affairs of the Bank of Upper Canada."

THE NEW DOMINION MONTHLY.—The March number of this Canadian monthly is before us, and contains a large amount of reading matter, a map of Abyssinia, and an engraving of the Mission House, Carleton Place, Labrador. Published by John Douglas & Son, 128 Great St. James Street, Montreal; \$1.00 per annum. The publishers of the New Dominion Monthly desire to secure canvassers in every county and township. For terms apply, with suitable credentials, to John Douglas & Son, Montreal.

BLACKWOOD.—The February number has been received, and contains the following papers:—Reviews, conclusion; Memoirs of Sir Philip Francis; Linda Tresselt, part V.; Cornelius O'Dowd; Historical Sketches of the Reign of George II.—No. 1.—The Queen; Penitence, and the Irish at Home and Abroad; The Queen of the Highlands. Leonard Scott & Co., publishers, 140 Fulton St., New York. Terms: For Blackwood or any of the Reviews, \$4 a year; Blackwood and all our Reviews, \$7; for four Reviews, \$15; Blackwood and the four Reviews, \$15.

FRESHET AT VIENNA.—A special telegram from Vienna, says: The large quantity of snow melted on Saturday last, caused the Oder Creek to overflow portions of the village on Monday. All along the front streets the water rushed through the streets from four or five feet. How boats passed freely up and down the business streets, and families living near the creek had to leave their houses. The lumber, shingles and fences were carried down the stream. Had the ice broken and come down, nothing could have saved a part of the village from destruction. The water has been the highest ever known before. The floor of the telegraph and postoffice was covered with water to the depth of two feet. No other casualties.

CENTRAL SCHOOL.—The system of Central Schools, we see by our exchanges, is being introduced into every Town and City in Canada, where new school houses have to be built. In Ottawa a new central school has just been completed, of which the Ottawa Citizen says: "The handsome Central School House, east, which our spirited School Trustees have recently had erected is now we are glad to observe, completed and ready for occupation. It will be opened on Monday next and the occasion will be hailed with joy by all friends of education. We must compliment all parties concerned on the really capital building which has been erected, as the Central School House, east. Spacious, cheerful and well ventilated, possessing those qualifications which modern civilization requires."

County Court.

The County Court and Quarter Sessions commenced yesterday, Hon. G. Sherwood, County Judge presiding. Messrs. Ems and Campbell associates. There is but one criminal case on the calendar, and only some nineteen civil cases. Several undefended issues were disposed of yesterday. The following is the Grand Jury.

Samuel Bailey, Foreman.
Frederick Rice, D. Allan,
Mark Lancaster, E. W. White,
Samuel Kilpatrick, Francis Vanderroot,
William Wilson, Thomas Cassidy,
Charles Kirk, John Chapman,
John Abbott, Jacob Caldwell,
Ezekiel Otter, John Otter,
John Spry, George Wilson,
Daniel Caniff, Edward Koschub,
Adam Berthel, William J. McQuig,
Philip Brown, William Courtney.

SECOND DAY.

Wednesday, March 10, 1888.
The Court opened at 9 o'clock the Hon. Judge Sherwood presiding.
The forenoon was occupied with the consideration of the following case:
WALLBRIDGE vs. PLAYFAIR.—This was an action brought by William J. Wallbridge against John Playfair, to recover the balance due on the purchase of a Yankee gate manufactured at plaintiff's foundry, at the request of defendant, plaintiff prayed the making and delivery of the gate.
Defendant proved payment of \$150 and alleged that the gate was not worth a greater

amount. Several witnesses were called to support this view. Verdict for defendant. L. Wallbridge, Q. C. for plaintiff. R. P. Jellett for defendant.

Death of Lt.-Col. Dunn.

The news of the accidental death of Lt.-Col. Dunn of the 33rd Regiment, will be received with general regret throughout Canada. Col. Dunn was the son of Mr. Dunn, Receiver General of Canada for over twenty years, and was a popular and promising officer. He was attached to the Abyssinian expedition. His death occurred at Senaf, on the 28th of January in the following manner: The deceased had gone out with his rifle, after game, and from the account of his native servant, who was the only person with him when the accident happened, it seems that, as he was stooping forward over a ditch to get some water, both barrels suddenly went off, and lodged their contents in his left side. His death must have been instantaneous. He was just able to say, "Run for a doctor," and then dropped dead. There is not an officer of the same rank in this force whose loss would be more severely felt. Indeed the whole army has sustained a heavy loss in the death of Col. Dunn. He was the youngest colonel in it, and his career had already given sufficient promise of distinction to justify the belief of his friends that the highest military appointments were within his reach. In the ever-memorable charge of the Six Hundred at Balaklava he won the Victoria Cross, conferred upon him by the unanimous vote of his comrades who saw his gallant bearing in the peril which they shared with him; and partly in consequence of this achievement, but more as a reward for the great share which he took in raising the 100th Regiment in Canada, when the Indian mutiny broke out, he obtained his promotion so early. Even those who did not know Colonel Dunn well enough to appreciate his good qualities cannot but have a keen pang of regret at the thought that so gallant a soldier, in the prime of manhood, and with fresh hopes of distinction just dawning upon him, should have died such a death.

Royal Black Knights of Ireland.

The annual Session of the Grand Black Chapter of Canada, in connection with the Royal Black Knights of Ireland, was held in the Orange Hall, King street, Hamilton, on Friday, March 8th.

Bro. Sir Knight F. H. Medcalf occupied the chair, as Deputy Grand Master, in the absence of Bro. Sir Knight Thomas Keyes, of St. Catharines.

A large number of delegates were present, and the business transacted was, it is said, of importance to the Order.

The Grand Lodge adjourned, after sitting to a late hour, the following officers being elected for the current year:

Grand Master—Bro. Sir Knight F. H. Medcalf, Toronto.
Deputy Grand Master—Bro. Sir Knight J. Ross Robertson, Toronto.
Grand Chaplain—Bro. Sir Knight Reg. Ainslie Dawson, Waterloo.
Grand Treasurer—Bro. Sir Knight J. G. Moore, Belleville.
Grand Registrar—Bro. Sir Knight William McAndrew, Hamilton.
Grand Lecturer—Bro. Sir Knight Thomas Mills, Hamilton.
Deputy Grand Treasurer—Bro. Sir Knight John Reid, London.
Deputy Grand Registrar—Bro. Sir Knight W. H. Scholes, Belleville.
Deputy Grand Lecturer—Bro. Sir Knight James McCowan, Belleville.
Standard Bearer—Bro. Sir Knight McCabe, Hamilton, and Bro. Sir Knight Griffith, Brantford.
Grand Censors—Bro. Sir Knight Morrison, Kingston, and Bro. Sir Knight L. S. Giffin, Massena.
Grand Pursuivant—Bro. Sir Knight Harron, Hamilton.

The next meeting of the Chapter will be held in the city of Kingston.

Mr. Wm. Johnson, of Kilkyleigh House, Belfast, is Grand Master of the Order in Ireland. He was arrested for a breach of the Party Processions Act, as announced by cable some weeks ago.

After adjournment of the Chapter, the delegates sat down at a sumptuous repast at McCabe's Volunteer Hotel, King street, Bro. Medcalf, G. and Mayor O'Neil on his right, and Bro. J. Ross Robertson, D. G. M., and Bro. Wm. Johnson, ex-Grand Registrar on his left. About one hundred were present, and enjoyed themselves to a late hour with toast, song, and sentiment.

For The Intelligencer.

Albert College.

I had the pleasure last evening of attending one of those entertaining and edifying treats given every term at Albert College by the ladies of the "Adelphi Society." The exercises consisted of essays, recitations, and some very interesting readings from their society paper, "Zetateion," interspersed with vocal and instrumental music. This was followed by refreshments prepared for the occasion, after which the company adjourned to the Reception Room for a social "Conversation." The company dispersed about eleven, all seeming to be highly pleased with the amusement and instruction of the evening. I would suggest to the members of the "Adelphi" that it might be advisable to arrange with one of the publishers in Town to issue their paper in a neat magazine form; that would give stability and audience to their paper; it could not otherwise possess. It would be well patronized in Town, I pre-

sume, and all old students would be only too happy to become regular subscribers. Notwithstanding the unfavorable state of the streets, a goodly number from Town were present, and all seemed to appreciate the efforts of the young ladies, and to wish a hearty success to "Zetateion."

Business Notice.

ROBERT NICKLE'S ENTERTAINMENT.—We are pleased to state that the citizens of Belleville will, on Friday evening of this week, be able to witness the acknowledged annihilator of the art of prestidigitation, and from the enormous leaped upon him by our Montreal exchanges, also the crowded houses which welcomed his opening performance and the second, his closing one, we can assure our citizens they will see strange sights of originality by this great Prestidigitator of United States repute. Mr. Nickle's manipulation of cards, coins, bullets, &c., is spoken of in the highest terms, as equalling the great Hermann, by those who have seen him. Mr. Nickle was formerly a Belleville man, and came to show his great talent and genius, as developed in his profession. Mr. Nickle is also the inventor of several of the greatest illusions performed by other magicians. The universal bewilderment in a gentleman's hat and the growth of flowers is his invention, also the celebrated Nickle's card, which he has sold in the audience, they bring a very pleasing freemason amusement. Remember Thursday, March 12th, when Mr. Nickle gives his first representation. We advise those who wish to go in comfort to go early, as we can assure the Belleville a good house.

Telegraphic News.

BY ATLANTIC CABLE.

PARIS, March 10.—It is reported to-day that the Emperor Napoleon will pay a visit to St. Petersburg in June.

ST. PETERSBURG, March 10.—The Nicolay Railroad is to be disposed of to a newly formed Russian Company, the terms of the sale have already been settled; the property rights of Americans in the material and rolling stock of the road are protected by provisions of law.

BERLIN, March 10.—A commercial treaty between the Zollverein and the Austro-Hungarian Government has been concluded and signed.

LONDON, March 10.—The Prince of Wales will soon make a visit to Ireland, where he is to be made a Knight of the Order of St. Patrick.

The Fenians who were captured at Merthyr Tydfil, in Wales, have been indicted for treason and will be tried at the Swansea Assizes.

Dispatches from Annesley Bay say that King Theodore had arrived in the immediate vicinity of Magdala with his troops and war material. The advance of the British was steadily pushing on under Gen. Napier, and at last accounts was two days' march beyond the village of Ateragat.

CORE, March 10.—The Grand Jury yesterday presented an indictment against Capt. Mackay for murder, and against Marx and Walsh as accessory to the crime.

LONDON, March 11, 1:30 p. m.—Consols 93½ to 93½; Bonds 7½ to 7½; and Consols: Erie 48½; L. & N. 89½.

LIVERPOOL, March 11, 1:30 p. m.—Cotton firm and less active; prices unchanged; sale 12,000 bales. Breadstuffs generally quiet. Corn declined to 42s 9d; Beef firm at 11s; Lard dull at 57s; Tallow firm at 44s.

ANTWERP, March 11, 1:30 p. m.—Petroleum dull and unchanged.

QUINCY, March 11, 1:30 p. m.—The steamship "City of Boston" and "Britannia" have arrived.

American Despatches.

SAN FRANCISCO, March 9.—Advice from Victoria state that the excitement caused by the threatened Fenian invasion still continues. Gunboats had been stationed in the harbor and a large body of marines placed on board. The powder magazine, opposite the city, and different engine houses are strongly guarded. The volunteers have received orders to hold themselves in readiness in case their services be required, in fact every precaution has been taken to secure the safety of the city. Information of a startling nature has been received, which is only known to the authorities, but the general impression prevails that they have been badly hoaxed.

NASHVILLE, March 10.—Two United States soldiers were killed yesterday in an encounter with illicit distillers, in Clayborne Co., East Tennessee.

NEW YORK, March 11.—The steamer "Kilg Star," with California passengers, arrived this morning. The steamer "Fulton," of the opposition California line has also arrived.

CHICAGO, March 10.—A fire occurred at the drug establishment of Darby, Leitch & Co. beside several adjoining buildings. Loss about \$30,000.

NEW YORK, March 11.—The Tribune's Washington special says: The board of managers of impeachment will file their replication to the President's return to the summons on Monday, and ask that the trial proceed at once. Should the President's counsel ask for longer delay, the managers, on the part of the House, will resist it, and will be prepared to argue the question before the Senate. One of the managers expressed the opinion to-night that the trial could not commence more than two weeks. The President has a plan of his own for transacting business through Gen. Thomas, and Representative Boutwell has prepared a Bill, which he will present in a few days, providing that all communications of an official character between the President and Congress shall pass through the War Department. Secretary Seward was in consultation with the Foreign Affairs Committee, urging immediate action on Mr. Bancroft's

The Council went into Committee on Roads and Bridges. Hon. Mr. Flint in the chair.

The Report of the County Surveyor, relating particulars of repairs to bridges and other work done, and suggestions for other work, was read and considered. The report acknowledged that the Surveyor had reported from Mr. Bailey's By-Law, but the Council, when he commenced to repair the bridges, they required a larger expenditure than first estimated. The Surveyor was directed to comply with the law in future. The amount for repairs was concurred in after some discussion.

On motion of Mr. Wood, seconded by Mr. Ward, the Surveyor was instructed to repair Keller's Bridge without delay.

The Clerk was directed to apply to the proper party for the plans and specifications for the County gale, so that the County Surveyor could have access to them.

On motion of Mr. Hamilton, seconded by Mr. Conley, the County Surveyor was instructed to examine the road from Marmora to Blount and report what repairs are necessary.

On motion of Mr. Conley, seconded by Mr. Walker, the County Surveyor was instructed to report respecting the road on the 4th concession of Hawdon, between Lots 6 and 7.

On motion of Mr. Wood, seconded by Mr. Ward, the County Surveyor was instructed to examine the road between Blount and Hungerford, and report at the next meeting what repairs were necessary. With respect to the petition of the inhabitants of the eastern section of Hungerford for a grant to make a good road to the gravel road, the Reeve and Mr. Flint spoke as so long in favor of doing something to enable the inhabitants of that section to get out to the gravel road. The Surveyor was ordered to examine the road and report at the next meeting.

A petition of John Houston, asking for certain allowance of road, in lieu of allowance given by him, was laid over.

Mr. Gibbons moved, seconded by Mr. Stokes, That whereas the Township of Hungerford has appropriated \$300 towards building the bridge known as Caton's Bridge, and the farmers of the vicinity having given \$300 towards same bridge, and it requiring \$300 to build it, the County Council appropriate \$300 for that purpose.

After some discussion the motion was referred to the Committee on Ways and Means for an appropriation.

Mr. Conley moved, seconded by Mr. Walker, That \$100 be appropriated to build the bridge on the Ridge Road. It was referred to the Committee on Ways and Means.

Mr. Hamilton moved, seconded by Mr. Walker, That the County Surveyor be authorized to complete the road through the swamp from Marmora to Lake. It was referred to the Committee on Ways and Means.

Mr. Cummings moved, That the report of the Committee appointed to examine the Trenton Bridge be accepted, and that the Surveyor be instructed to carry out the recommendations of that report. The motion was laid on the table until the report was brought up.

Mr. Armstrong moved, seconded by Mr. Rowe, That a bridge be built across the Trent at Chisholm's Rapids, in accordance with the Surveyor's Report. Laid on the table until the report was brought up.

Mr. Clapp moved, seconded by Mr. Daly, That the sum of \$200 be appropriated to repair the bridge across the Mura at Archibald Ross'. Laid over.

Mr. Hamilton moved, seconded by Mr. Wood, That the County Surveyor be instructed to examine the road from Marmora to Madoc, and to see what it will cost to put it in repair; and also to examine the road by way of Bailey's Corners to El Dorado, and ascertain the cost of making it a good road, with a view to decide which road shall be adopted as a County Road.—Carried.

Committee rose and reported progress, and asked leave to sit again.

The Council adjourned until 3 o'clock, p.m.

AFTERNOON SESSION.

The Council met at two o'clock pursuant to adjournment.

Mr. Wood introduced a By-Law respecting the Gravel Roads, providing for keeping them in repair, &c., which was read clause by clause and adopted. The By-Law is somewhat similar to the one in force last year. It provides for the appointment of six members, who, with the Warden, shall form a committee who shall have charge of the roads, and to give out contracts, say what work shall be done, what material shall be used, &c., and define the duties of the County Surveyor, Foreman, &c.

Committee rose and reported progress, and asked leave to sit again.

Council went into Committee on Roads and Bridges. Hon. Mr. Flint in the chair.

Mr. Cummings' motion respecting the repairs to Trent bridge was considered. The report of the committee stating what repairs should be made, was read, and plans and specifications of the proposed repairs were laid on the table. On motion of Mr. Cummings, seconded by Mr. Wood, it was decided that the repairs be recommended by the committee be proceeded with in accordance with the plans and specifications of the Surveyor, and that the Surveyor be instructed to advertise for tenders, and that the same be submitted to the Gravel Road Committee.

Mr. Farley moved, seconded by Mr. Clapp, That \$100 be granted towards improving the highway in front of Albert College.—Referred to Committee on Ways and Means.

treaty relative to the rights of American citizens in foreign countries. He informed the Committee that it was of the utmost importance that speedy action should be taken, as it would lead the Government in bringing about the negotiation of other treaties under consideration. The members of the Committee assured him that action should be taken at an early day. It is given out to-night that Hancock is to be relieved in a few days and transferred to the new division of Washington, which was created a few weeks ago. It is hinted that the President will insist upon his right, as Commander-in-Chief of the armies of the United States, to issue orders to him direct, instead of sending them through Grant.

TOLDO, March 11.—The damage by the frontier here is greater than it was thought to be. Many buildings were flooded. The amount of loss cannot yet be estimated, but it will be large. The shipping lying in winter quarters is injured. The trains on all the railroads centering here are running regularly.

Miscellaneous Items.

The thread of the silk worm is so small that many folds are twisted together to form the finest sewing thread, but that of the spider is smaller still, for two drachms of it by weight would reach a distance of 100 miles.

The *Alouette* also learns that the recently surveyed land near Pembina is to be at once opened for settlers, in which case we may expect much of the rich agricultural land of the Pembina valley to be at once taken up.

The *Troy Budget* learns that the military and civil branches of the Peninsular Brotherhood in that city intends to make an imposing parade on the forthcoming anniversary of Erin's Patron Saint, March 17. Four companies in uniform will parade, all outfitted by veterans.

A Western paper says that the colour of the snow which fell at Sarnia recently was strongly impregnated with smoke; and so much so was this the case that when melted the water had an ink hue, which is retained even though all the ink has been washed out. In other localities the snow was impregnated with a fine silting-sand. We commend these phenomena to meteorologists.

An illicit distillery, located in a huge cave on the banks of the Canby river, in De Witt county, Tenn., has just been discovered and seized. The path to the still was only two feet wide, and ran along the precipitous side of the river bank, which is three hundred feet high, and though the revenue officers succeeded, with the help of experienced guides, in reaching the cave, they have yet no idea how the whiskey, when made, was removed from the hole in any large quantities.

The leading organs in the United States scold the idea of a war with England.—The *New York Times* says in its issue of the 10th inst. "The Southern Confederacy, its dingy garments rolled in blood, would have a awful resurrection. It would be supported by British gold, and animated with the wildest hatreds and thirst for vengeance. Canada, incensed by Fenian raids, and aided by the British ships and armies, would give us an ugly fight on our northern border. Our sea coast—Atlantic, Gulf of Mexico, and Pacific—would be menaced by British cruisers, and we would find our feet matched those of England, broadside, on the high seas. The Mormons and the Indians, from the Blackfoot to the Comanches, would infest the heart of the continent with hostile hordes."

Store-keepers!

Farmers! And Others! SHOULD BUY THEIR TEAS FROM THE IMPORTERS DIRECT.

The Montreal Tea Company,

6 Hospital Street, Montreal.
HAVE sent over One Thousand Packages to different parts of the country—and receive every day assurances that the Tea gives entire satisfaction.

Subjoined are a few of the numerous testimonials already received:

Montreal Tea Company.
GENTLEMEN,—The six chests of Tea forwarded some time since arrived in good order. The quality is pure and excellent, and we repeat of it in particular, having the best quality of Tea to be had for my guests, I am pleased to acknowledge that it gives general satisfaction. Your obedient servant, JAMES EDGAR.

Montreal Tea Company.
GENTLEMEN,—The box of 20 lbs. English Breakfast Tea which you sent me was of excellent quality, and fully as good as we have had for some time. Yours respectfully, D. ANDERSON.

CARMAN, American, Consul, Belleville. BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada, for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession).

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck, of 18 inches in width, which has increased to 2½ feet, and a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of over fifty-six dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—13 rods.

The territory is admirably situated for mining purposes, being a high ridge covered with indications of mineral veins. There are numerous places on the land fully as promising as the one on which the shaft has been sunk, and which would unquestionably yield as well. The large quantity of land, and the prospects of other gold-bearing veins, make it certain that the Company will be able to subdivide the property as soon as the further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the proprietary of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz miner now in this country.

It is intended to have further crushing in a few days, and negotiations are in progress which, if carried out, will secure a mill to the Company at once, so that regular work will be gone on with without delay, and dividends may, in that case, be expected in a short time.

Belleville, Jan. 27th, 1888. 228d-1f

India and China Tea Company.

BY ATLANTIC CABLE.

CORK, March 11.—The trial of Capt. Mackay concluded to-day. Verdict—Not guilty of murder.

BRISBANE, March 11.—The treaty just concluded between the North American Confederation and the United States of America, providing for the protection of the rights of naturalized citizens, was to-day unanimously ratified by the Federal Council.

It is reported that a proposition was recently made to Lord Stanley to submit the Alabama claims to the arbitration of Panama, and that he was willing to entertain the proposition, so far as it applied to the question of indemnity, but he refused to submit other points in dispute.

LONDON, March 11.—In the House of Commons last night a warm debate took place on the condition of Ireland, and the following resolution was introduced, but on further consideration was postponed until to-morrow:—"That the discontent of Ireland is a source of uneasiness to the Empire, and must be remedied; that laws for Ireland should be framed to suit the wishes of the people; that the present church, school and land tenure systems are unjust, and that, in view of the fact that the wrongs should be righted."

ROME, March 11.—One hundred Canadian Zouaves, who volunteered for Papal service, have arrived here.

LONDON, March 12.—General Dix, American Minister to France, has arrived in this city and will remain two or three weeks. It is said he came on business connected with the question of the Alabama claims.

The House of Commons last evening, in committee, agreed to report to the House for the passage of a bill introduced by Mr. Gladstone, for the abolition of church rates. Mr. Watson, recently arrested, has been discharged. The case of Mallory is to be brought up in the House of Lords next week.

LONDON, March 12, 120 p. m.—Consols 95 to 95½; Bonds 7½ to 7½½; Erie 49½; Liverpool, March 12, 120 p. m.—Cotton quiet and steady; sales about 10,000 bales. Corn 42½; Beef 11½ to 12; Pork firm; Lard quiet. New York, March 12, 120 p. m.—Petroleum quiet.

American Despatches.

NEW ORLEANS, March 11.—The *Marxio Drape* published an extract from a letter written by Gen. Grant to Mr. Romero, in which he says he intended to visit Mexico after the election, and when matters go on well. Particulars of the attempt to assassinate Juárez show that an ex-imperial officer and a foreigner in command of a city regiment were the ringleaders. They are believed to have been employed by Santa Anna. The plot included the murder of the Cabinet.

BURLINGTON, Vt., March 11.—William Henry Blissell, D. D., Rector of Trinity Church, Geneva, New York, was unanimously elected Bishop of Vermont by the Episcopal Convention in this city yesterday.

NEW YORK, March 12.—The *Herald's* Vera Cruz correspondent says a British consular agent has been detected in smuggling a large amount of specie out of the city. The commander of the fort was about to fire on the vessel carrying the specie, when a British corvette anchored between it and the fort. The troops composing the expedition to Fusan were retreating. The climate of the peninsula was devastating the troops. The governor who was objectionable has been advised to resign and has gone to the capital.The *Herald's* Washington special says, it is almost certain that six republican senators will vote conservatively on questions involving the President's right in the impeachment trial, and many concede that the same number will fail the party at the final issue. With but one important amendment, the treaty with the German confederation relative to naturalized citizens, will be conferred.The *Tribune's* Washington special says the House impeachment managers are marshalling their witnesses, preparing their testimony, and shaping their action so that the trial may be entirely over by the first of May.The *World's* Washington special says: Mr. Stanbery has concluded to resign his position as Attorney General, in order to take part as counsel for the President on the impeachment trial, and has presented his resignation, which Mr. Johnson has just received. So general is the belief that the Supreme Court will decide the Reconstruction Act unconstitutional that the Radicals are making an effort to induce Grant to leave an order changing the time for holding the trial. There is official authority for denying the story that the President has induced Gen. Sherman to sign a new War Department order, which will place of guess work, originating in irresponsible evening paper of this city, hastily given to sensation.NEW YORK, March 12.—Both Stock Exchange and Open Board to-day decided by formal vote to receive any Erie draft from March 15. This is done to prevent Daniel Drew from using any new stock. It is rumored that he issued a large amount without authority. The *Wall Street Journal* says: The loan market is active; discount rates improved; Railways quiet; Exchange quiet. The steamer "Vesta" took out \$275,000 in specie.

Town Council.

WEDNESDAY, March 11, 1888.

PRESENT.—His Worship the Mayor, and Messrs. Sutherland, Diamond, Robertson, McKenney, McIntosh, Waters, Henderson, Foster, Brown, Tannahill.

Petitions for Tavern Licenses from twenty persons accompanied with the necessary certificates were read.

A letter was read from the License Inspectors representing that they had received an application from the present lessees of the Anglo-American Hotel, and also representing that it was at this house the murder of Daniel Sullivan took place, and that the proprietors of the same refused at the time permission to hold the Inquest there, and they were not prepared to grant a license without first laying these facts before the Council. Considerable discussion took place subsequently with regard to this question, and finally on motion of Mr. Tannahill, seconded by Mr. Waters, the matter was referred to a special committee consisting of Messrs. Waters, McKenney, Tannahill, Henderson and Tannahill.

A letter was read from S. B. Burdett, representing on behalf of the relatives of the late Daniel Sullivan, that his murderers were still at large, that the Attorney-General had refused to offer a reward for the apprehension and conviction of the murderers, but that he had replied that the local authorities should attend to the matter, and therefore requested that the Town Council should offer a reward of \$500 for the purpose named.

The question was subsequently discussed and on motion of Mr. Henderson, seconded by Mr. McIntosh, the Chief of Police was authorized to offer a reward of \$100 for the apprehension and conviction of the murderer of one or both of those charged with the murder of Sullivan, said parties being Kehoe and Quinn.

Messrs. Haslett and Innes laid before the Council plans of maps of the Town, which were referred to the Harbor and Town Property, and Finance Committee.

A petition from R. B. Bell requesting being fined for selling liquor without license was referred to the Inspectors.

A petition from the Belleville Grammar School Trustees asking for an appropriation of \$55.25, being the amount of deficiency in supplying the school with wood, &c., was referred to the Finance Committee.

The Chief of Police handed in his report of crime for 1887.

The Committee on Poor and Sanitary submitted a report naming certain persons who they recommended to receive pecuniary support from the Town, which was adopted.

The Finance Committee reported several accounts which were adopted in Committee and passed by the Council. The sum of \$250 was granted to the Ferry Committee to enable them to complete the landing.

The Committee on the Harbor and Town Property Committee, said he had called a meeting of the Committee that afternoon, but there was no quorum. The question of removing the two piers at the mouth of the river was one of the matters which should have come before the Committee. With regard to the Dredge, he had, while in Toronto, spoken to the Commissioner of Public Works, and was told that he belonged to the Dredge Commission.

Mr. Diamond, on behalf of the Harbor and Town Property Committee, said he had called a meeting of the Committee that afternoon, but there was no quorum. The question of removing the two piers at the mouth of the river was one of the matters which should have come before the Committee. With regard to the Dredge, he had, while in Toronto, spoken to the Commissioner of Public Works, and was told that he belonged to the Dredge Commission.

Mr. Diamond, on behalf of the Harbor and Town Property Committee, said he had called a meeting of the Committee that afternoon, but there was no quorum. The question of removing the two piers at the mouth of the river was one of the matters which should have come before the Committee. With regard to the Dredge, he had, while in Toronto, spoken to the Commissioner of Public Works, and was told that he belonged to the Dredge Commission.

The Mayor stated that he was happy to say that the Bill legalizing the assessment of the Town had been law. He presumed printed copies would soon be in the hands of the members.

Council adjourned.

Discovery of Gold at the Cape.

While we in Canada are rejoicing at the idea of very rich and extensive gold deposits being discovered within our borders, it seems that the same thing has been said of certain districts at the Cape of Good Hope. A German Mineralogist, Herr Much, has been exploring the country of the Free Republic, a few miles north from Cape Colony. And in a letter dated Potchefstroom, Dec. 2nd, 1887, he writes as follows:—"Just returned from a second trip to Mosselkade's country. I give you short notice that I have been very successful in finding gold, not in a small scarcely visible speck, but in great veins of quartz and in the widest goldfields; one of them more than thirty miles long, the other about twenty miles broad, besides numerous small parallel veins."

A Boston paper intimates that since free soap was introduced into this city, the deposits in the service banks have increased.

Gold News.

Mr. J. R. Vantassel, of Stirling, has just shown us a certificate from Dr. Otway, of an assay made by him yesterday of a small quantity of ore obtained from lot 27 in the 10th concession of Tudor, from a mine at the depth of 14 feet. The yield was very handsome, being at the rate of \$2 per ton of gold and \$37 per ton of silver.

The Impeachment Question.

To-morrow, the 13th of March, President Johnson has been summoned to appear before the Senate, "then and there to answer to the articles of impeachment; and then and there to abide by, obey, and perform such orders, directions and judgments as the Senate of the United States shall make in the premises, according to the Constitution and laws of the United States." A writer in the *Washington National Intelligencer* is of opinion that Macaulay, after all, is mainly responsible for the whole impeachment business. His magnificent description of the arraignment and trial of Warren Hastings has fascinated and fired the souls of a good many of their prominent public men, who think they have a fair chance of having their names made immortal in connection with a similar proceeding. However, to such a consummation. They have neither the same actors, nor the same criminal; and shall also lack the historical. This impeachment is more likely to be a caricature than a copy of that. The immortality of a caricature is not always to be coveted.

Crime in Belleville.

The Chief of Police submitted his annual report of crime in Belleville to the Council, at its last meeting yesterday evening, and we subjoin a copy thereof. The tabular form accompanying it appears to have been compiled with much care, showing each offence monthly, but our space only permits us to give the following abstract. Under all the circumstances of want of employment, an unusually severe winter and a constant floating population, it is a matter of congratulation that crime is steadily on the decrease, and that we can compare favorably with any other town of similar extent in the Dominion.

ABSTRACT OF OFFENCES.

Burglary.....	3	Increase.....	3
Larcenies.....	10	Decrease.....	6
Aggravated assaults.....	33	Increase.....	35
Common assaults.....	8	Decrease.....	2
Riotous and disorderly.....	19	Increase.....	1
Breach of License Act.....	88	Decrease.....	1
Breach of By-Laws.....	12	Increase.....	1
Breach of Market Law.....	18	Decrease.....	28
Vagrancy.....	24	Decrease.....	12
Drunkenness.....	21	Increase.....	7
Malicious injury to property.....	14	Increase.....	2
Trespass.....	4	Increase.....	1
Lunacy.....	4	Increase.....	1
Found in suitcases.....	4	Increase.....	4
Damages to sheep.....	3	Increase.....	2
Breach of Militia Act.....	3	Increase.....	2
Other offences.....	18	Decrease.....	28

Making a total of 420 offences, of which 9 were sent to trial, 161 dismissed and 250 convicted.

SIR.—I have the honor to submit, for the information of His Worship the Mayor and Town Council of Belleville, the annual report of crime for 1887.

It varies in a few instances from the reports which I have had the honor to submit in former years, and although an increase of 38 cases of assault is exhibited, the total number of offences is a decrease of 12. It cannot be deemed a criterion of an advance in that particular offence, the greater number being of a very trifling nature, and the majority of them dismissed by the Police Magistrate.

Three cases of burglary form a marked exception, but even in this instance our decreased case was from the rural district, and the other two were rendered amenable and committed for trial.

During the year 1887 there were 136 persons arrested by the police, both with and without warrants, of which number 71 males could be read and write, and 10 females. The following cases were as follows: 100 Canadians, 9 English, 5 Scotch, 1 from the United States, 1 Dutchman and 1 Frenchman.

Since my last annual report a Police Station has been erected, in connection with the Fire Department, but the police have not yet occupied it. I would respectfully suggest that the rooms be fitted up for occupation as early as practicable.

The necessity of two additional men for a constabulary force is becoming more urgent, and it is respectfully submitted that it is necessary. This course, if adopted, would be found very beneficial to the public, and the Chief of Police would be enabled to perform the ordinary duties of a constable, and cannot, therefore, give his attention to his most important functions. He would be considerably increased by the appointment of two additional men.

I respectfully submit these suggestions, and have the honor to subscribe myself, Your very obedient servant, GEORGE JAMES, Chief of Police.

Port of Belleville.

The following is a comparative statement of the Imports and Exports for the port of Belleville for the years 1886 and 1887:

IMPORTS.	
The Imports in 1886 were \$118,816; Duties collected, \$43,739.12.	
In 1887 the Imports were \$150,470; Duties collected, \$15,960.39.	
EXPORTS.	
1886.....	\$258,917
1887.....	199,023

—Prince Alfred during his visit to Australia, had the honor to dine at a Methodist college named after himself.

up the County Buildings and Registry Office payable by the Town of Belleville.—Carried.

The Warden suggested that Dr. Boulter should explain the new law respecting Agricultural Societies in the Electoral Divisions of the Province.

Dr. Boulter explained that the Act provided for the establishment of Agricultural Societies in the Electoral Divisions, and that the Government would grant the sum of \$700 to each society so established, as necessary to the provisions of said Act.

Mr. Farley thought it would only be necessary to organize a new society in the East Riding of Hastings.

Dr. Boulter said, as the divisions in this County had been changed it would be necessary to establish new Agricultural Societies in all the Electoral Divisions to secure the grant of \$700.

Mr. Flint agreed with Dr. Boulter.

The Warden named Messrs. Farley, Deasy, Rose, Armstrong and Ward as a Committee to report what amount should be granted to Bartlett, Esq., Police Magistrate, for deciding County cases, said Committee to report to-morrow.

Council adjourned till Thursday at 10 o'clock.

Daily Intelligencer.

BELLEVILLE, WEDNESDAY, MARCH 11.

MILITARY SCHOOL.—We are pleased to observe that at the late examination at Kingston, the Cadets who obtained a second-class certificate, is the name of Mr. Chas. Anderson, of Melrose.

SHOW SHOS RALES.—The lovers of this interesting and exciting sport will remember that the show was to take place to-morrow on the race course, commencing at 12 o'clock noon. Entries may be made to-night with the Secretary. For particulars see advertisement.

LACROSSE WALTERS.—We have received from the composer a copy of the much admired *LaCrosse Walters*, by Mr. St. G. B. Crozier. They are now on sale at the different book stores in the town. They are very highly spoken of in musical circles, and we have no doubt the edition will be rapidly taken up.BANK RETURN.—The *Montreal Gazette*, referring to the Bank returns in the last *Canada Gazette*, says:—"The statement of the Merchants' Bank presents the most interesting features in this week's *Gazette*. This Bank has for some months steadily pursued the policy of concentrating its resources for the one purpose of assuming the debts of the late Commercial Bank without danger to itself, and its Coin, Bullion and Legal Tenders now amount to the enormous sum of \$849,517. This, moreover, is the average of the four weeks of the month, and we should not be surprised to hear that the amount on hand of gold and notes, including bills of other banks at the time of the assuming the Commercial liabilities, was \$1,000,000, or say one-tenth of the total held by all the Banks."

Business Notice.

ENTERTAINMENT TON-EVENING.—Mr. Robt. Nickle, "The World's Prestidigitator," gives his first representation of acrobatic Eastern illusions to-night, and in looking over the programme for the evening we pronounce it a very novel, choice and pleasing entertainment. We were somewhat surprised in having a description of some of the tricks performed by Mr. Nickle given to us. His trick of the universal brewer in a hat borrowed from the audience excels really the most credulous trick imaginable. While standing before the audience, and large glasses full of foaming beer, one after another, without the slightest hesitation as to the number. This is most marvellous, and the more so as being his own invention. Mr. Nickle has been known to perform this trick over two years, night after night, since he first invented it, and as yet, whether from want of self-confidence, or that the principle has not been detected, no other magician to this day has ever dared to attempt. We feel pleasure in introducing Mr. Nickle in his profession to our citizens, as we believe that they will consider him fully entitled to the title of "The World's Prestidigitator." We say, a full house for the Belleville. The Band will be in attendance.

Mr. Van Norman, Bookseller, has sent us a copy of Mr. Crozier's *LaCrosse Walters*, which have been so highly admired in musical circles.

A telegram from Bradford says the Cock-bait Flat is entirely submerged in water and floating ice. Parties living there were removed to town yesterday in boats.

—Mr. Alexander Somerville, the "Whistler at the Plough," intends proceeding to England shortly, with the design of publishing a book on Canada, calculated to influence England.

answer, and he moved, seconded by Mr. Finlay, That the Warden and Mr. Cummings be the deputation, which was carried.

Mr. Flint moved, seconded by Mr. Appleby, That Mr. T. Farnham be appointed Foreman of the County Grand Jurors in accordance with the By-Law, at a salary of \$300 per annum.

Mr. Gabourie moved, seconded by Mr. Stokes, That Mr. John Francis be appointed Foreman at a salary of \$400 a year.

Mr. Armstrong moved, seconded by Mr. Flint, That the motion, seconded by Mr. Rowe, That Mr. Farnham be appointed at a salary of \$400 a year.

The first motion, being the highest sum, was put and lost. Mr. Armstrong's amendment was then put and carried.

Mr. Gabourie's motion was then altered, appointing Mr. Francis, should the committee decide upon employing a second Foreman, at the rate of \$400 a year when employed, and in this shape it was submitted and carried.

The Council adjourned until two o'clock.

AFTERNOON SESSION.

WEDNESDAY, March 11, 2 P. M.

Council met at two o'clock, pursuant to adjournment.

The Warden called the attention of the Council to the fact that the sum to be paid by the County to the Police Magistrate of Belleville, for trying cases sent in from the County.

Moved by Mr. Emu, seconded by Mr. Finlay, That Mr. Morton, Esq., Treasurer of the Township of Huntingdon, be sub-Treasurer of school moneys for that Township.

Mr. Daly explained that the Council had already a By-Law providing that the sub-Treasurer should be sub-Treasurer of school moneys.

The By-Law in question was read by the Clerk.

The motion was passed.

The Committee of the Whole on Roads and Bridges resumed.

The Council resumed. The Committee on Roads and Bridges rose and reported. The report was received and adopted.

The Committee of the Whole on Ways and Means resumed.

Moved by Mr. Armstrong, seconded by Mr. Rowe, That the Council do grant the sum of \$3,000 to aid the erection of a bridge over the River Trent at Chisholm's Rapids.

Moved in amendment by Mr. Appleby, seconded by Mr. Anderson, That the sum of \$1,200 be granted to the Township of Sidney for the building of a bridge at Chisholm's Rapids, according to a plan and specification by the County Surveyor, said sum to be payable at one, two and three years, provided that the bridge be built to the satisfaction of the County Surveyor, and sufficient approaches to be made to the same.

Mr. Wood thought \$2,000 too much and \$1,200 too little, but was ready to support a motion for \$1,500.

Mr. Ward thought there was no necessity for such a bridge, and would rather propose to make a good road from the Rapids to the Frankford and Spring Road.

Mr. Walker thought the proposed bridge would benefit the inhabitants of the west side of Kawdon.

Mr. Hamilton thought it of no moment whether the people of Rawdon or Marmora wanted the bridge or not, if it was wanted for the general benefit of the County.

Mr. Wood moved, seconded by Mr. Clapp, That the sum of \$1,500 be granted, on condition that the bridge be a good and efficient one and completed within one year from the 1st December next, and that the road from Frankford to Chisholm's Rapids be put in sufficient repair.

In proposing the grant of \$1,500, Mr. Wood stated that if the above sum were found insufficient, the representatives of Sidney could return to the Council for an additional grant, which he had no doubt they would be liberal with.

The motions of Messrs. Armstrong and Ward were then withdrawn, and Mr. Wood's motion carried.

Mr. Daly moved, seconded by Mr. Clapp, That the Council pay three-fifths of the expense of putting the bridge at Ross, in the Township of Thurlow, in repair, the sum not to exceed \$500. This was withdrawn, and

Mr. Clapp moved, seconded by Mr. Daly, That the sum of \$200 be granted to the Township of Thurlow, to aid in the repairing of Ross' bridge over the Moira. Carried.

A resolution was presented from the Clerk of the County Court for a Record Book for the judgments of the Court, which was laid over for inquiry to be made as to the liability of the County to furnish books and stationery for the use of the officers of the Courts.

Mr. Appleby moved, seconded by Mr. Deasy, That the sum of \$400 be granted to the Township of Thurlow, to aid in the re-erection of the bridges over Sucker Creek and Mud Creek, on the old York Road. Carried.

The sum of \$125 per annum was granted to the County Grammar School at Belleville, on condition that children from the country be admitted to said school free of charge.

Committee rose, reported progress, and asked leave to sit again.—Granted.

Mr. Appleby called attention to the matter of the arbitration between the County and the Town of Belleville, respecting the proportion to be paid by each towards the expenses of the Registry Office.

Moved by Mr. Flint, seconded by Mr. Emu, That Mr. Appleby, Dr. Boulter and the Warden be a committee to ascertain the proportion of the expense of keeping

A CARD.

R. P. DAVY, ESQ.,
Agent of "The Insurance Company,"
of Hartford, Conn.

DEAR SIR,—I beg to acknowledge with thanks, the receipt of \$1,000 in full, of my claim for loss by fire, on the morning of the 25th Jan., on my premises on East Front street. The promptness with which the claim was settled, without abatement, simply upon filing with the Company the affidavit and statement of loss, will tend to establish further the reputation which the "Etna" now holds for liberal and immediate adjustment of all claims against them.

Yours truly,
JAMES GRANT.

The Montreal Tea Company,

6 Hospital Street, Montreal.

HAVE sent over One Thousand Packages to
different parts of the country—and receive
every day assurances that the Tea gives entire
satisfaction.

Unfolded here a few of the numerous testi-
monials already received:

"Montreal Tea Company, 6 Hospital Street, Montreal.
Gentlemen:—The six chests of Tea forwarded some
time since arrived in good order. The quality is pure
and excellent, and price cheap. As I am particular in
having the best quality of Tea to be had for my guests,
I am pleased to acquaint you that I give general satis-
faction. Your obedient servant,
WILLIS RUSSELL,
Mayor of Ottawa, Ottawa, Dec. 18, 1897.

"Gentlemen:—The box of English Breakfast
and Young Hyson Tea which you sent me gives great satis-
faction. I can say I am very much pleased with it.
Yours respectfully,
S. SKINNER,
Quebec, December 18, 1897.

"Gentlemen:—The box of 30 lbs. English Breakfast
Tea we had of you at 50 cents was paid to you in full.
I am very much pleased with it. I am, Sir, very
respectfully,
Yours,
JAMES HIGDON,
Montreal, December 18, 1897.

PROSPECTUS

MOIRA GOLD MINING COMPANY.

Capital Stock, \$100,000. Divided into 10,000 Shares.
WORKING CAPITAL, \$15,000.

HORACE YEOMANS, Esq., President. ANDREW THOMSON, Esq., Treasurer.
B. S. GILBERT, Esq., Secretary. J. G. SHURTZ, Esq., Superintendent.
MERCHANTS BANK, BANKERS. DEAN & GILBERT, SOLICITORS.

DIRECTORS:
HORACE YEOMANS, of Flint & Yeomans, Belleville.
ANDREW THOMSON, Banker, Belleville.
W. W. DEAN, Master in Chancery, Belleville.
JOHN G. SHURTZ, Superintendent.
JAMES LISTER, M.D., Belleville.
JAMES W. CARMAN, American, Consul, Belleville.
BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada,
for the purpose of working the mineral veins upon section 10 of Lot No. 19, in
the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession.)

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing
lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and
a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of
over fifty-six dollars in gold; the lode is clearly defined, and evidently extends the
whole length of the property—23 rods.

The territory is admirably situated for mining purposes, being a high ridge covered
with indications of mineral veins: There are numerous places on the land fully as
promising as the one on which the shaft has been sunk, and which would unquestionably
yield as well. The large quantity of land, and the prospects of other gold-bearing veins,
make it certain that the Company will be able to subdivide the property as soon as a
further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G.
SHURTZ, Esq., one of the Directors, who is largely interested in the property of the
mine, and who has had thirteen years' practical experience in the gold mines of California
and Nevada, and is unquestionably the most accomplished quartz miner now in this country.

It is intended to have a further crushing in a few days, and negotiations are in progress
which, if carried out, will secure a mill to the Company at once, so that regular work
will be gone on with without delay, and dividends may, in that case, be expected in a
short time.

Belleville, Jan. 27th, 1898. 228d-4f

The crops in south Australia will be a failure. Red rust is almost everywhere. Thousands of acres of wheat are not worth reaping. Appeals have been made to the Government to provide seed wheat for farmers. Wheat was up to 8s per bushel and flour to £30 per ton.

R. R. R.

The high praise which has been given to the use of **RAYBURN'S REMEDY**, proves their utility to con-
sumptives. There is no pain to serve to disease no man-
agement or swiftness in the destruction of life, but that the **RAYBURN**
Remedy will stop the cough in an instant, it is true.
Every one who has heard of it, or tried it, let those who
have not, and I, I can give it a trial. A few minutes
will prove its power of curing the most troublesome
cough. Let any person doubting its usefulness can
write to the R. R. R. Co. and receive a trial, or word
not true we will pay one Hundred Dollars.
See Dr. R. R. R. Co. on the National Guards of this
Union, drug.

Pneumonia, Epistaxis of Blood, Difficult Breathing Cured.
Wonderful Cures on the National Guards of this
Union, drug.

RIO DE JANEIRO, June 16th 1868.
Messrs. RAYBURN, LITTLE & Co.
Gentlemen—It is now eight years that I have
suffered from Pneumonia, and have had the best advice,
but could not be cured. I was in the hospital 109 days, and
all that I spent blood and matter, but seeing that I
could not get any better, I made up my mind and left
it. And, fortunately, I was cured by a friend, who re-
commended Dr. R. R. R. Co.'s preparation.
After taking the first dose of Relief and water, I
could breathe with ease, and felt my pains diminish-
ing. I continued the use of Dr. R. R. R. Co.'s Relief, and
my cough, and had a spontaneous relief, and water, I
was cured. I am now perfectly well. Truly, I took two bottles of
Relief and three boxes of Pills. I hope that the authors
of this preparation may have a great and prosperous
future.

John D. Evans,
PROVINCIAL LAND SURVEYOR, Civil
Engineer and Draftsman.

American Watches.

The true value of Machinery applied to
Watchmaking is not that by its use
Watches are made rapidly, but that they are
made correctly. Very few people know why
a Waltham Watch should be superior to any
other. In the first place, at Waltham
the Watch is regarded as only a machine, to
be constructed, like any other machine, on
mechanical principles. The factory is indeed
little else than a machine shop, the principal
work in which is not more upon watches than
upon machinery to make watches with. If
the watches are good, it is because the
machinery is good. Of course, there must be
no defect in the principle of plan or the
movement, no mistake in the size or shape
of the pieces of which it is composed, nothing
wanting in their properties, and no error in
their positions. These points once thoroughly
settled in regard to each part of every variety
of watch, it rests wholly with the machinery
constructed with infinite diversity of form and
function, expressly for the purpose, to produce
the finished pieces. The method established
in every department is the reproduction of
parts by mechanical means, and this is carried
out on the system of the most thorough sub-
division.

By means of multiplying gauges and
microscopes, tests and inspection for the
detection of wear in cutting tools, and for
faults and flaws in steel or stone, are made to
accompany beginning to end. As a necessary result,
the Watch goes together a finished machine.
Every part is found to fit properly in its
place. Every pin may be pushed till it
plunges, and every screw turned home—
Instead of sluggish and feeble action, the
balance, even under the pressure of the
lightest mainspring, vibrates with a wide
and free motion, and the beat has the clear
ringing sound always characteristic of the
Waltham Watch. The machine is a time
keeper from the start.

This system of watchmaking is unknown
in foreign countries, and is entirely original
with the Waltham Company. The Company
claim that by it they produce Watches that
cannot be equalled for every quality which
makes a watch valuable. Simple in plan,
only beautifully finished, substantial, accurate
and cheap, but is uniform to the minutest
details, not easily damaged, easily repaired,
and when repaired always as good as new.

There are different grades of finish in the
different varieties of Watches made by the
Waltham Company, as there are in all
kinds and shapes to suit all tastes and means;
but every Watch that bears the genuine
trade mark of "WALTHAM" is guaranteed
to be a good one, and nobody need be afraid
to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the
United States and British Provinces.

The Smiths.

John Smith—plain John Smith—is not very high-sounding; it is not the name of any hero in the way of novels; and yet it is a good, strong and honest name. Transferred to other languages, it seems to climb the ladder of respectability. Thus, in Latin, it becomes *Smithius*; the Italian smooths it off into *Giovanni Smith*; the Spanish, smoother still, into *Don Juan Smith*; the French, smoother still, into *Monsieur Smith*; the Russian smoother still, into *Smithovitch*; the Greek smoother still, into *Smithos*; the Turkish smoother still, into *Smith*; the Chinese smoother still, into *Smith*; the Japanese smoother still, into *Smith*; the Russian smoother still, into *Smithovitch*; the Greek smoother still, into *Smithos*; the Turkish smoother still, into *Smith*; the Chinese smoother still, into *Smith*; the Japanese smoother still, into *Smith*.

Lord Dunsinane's opinion.—I was going to say "I think," but I never bore myself with thinking; yet I think myself that when men are at high school, the rest of it. They call it a myth, yet the myth is very common, and are known even by "mythology" with men to be uttered by the fair to truth from "myth" to "mythology." I am glad to confess I am a myth, for when the word "mythology" is used, it is to be understood as a "mythology" with which brought him more experience and left happily.

A housemaid writes to a friend respecting the fashions of the city. She says: "As for the nose, the loer it is the more fashionable a dress. Miss Goodie gave me a new silk up, and I cut it in her, and Suzie Simmons cut off hers, and we attract a great deal of attention to our noses, promming in the streets like other ladies, and holden up our noses. Nobody isn't nothin' now which doesn't hold up her nose, and the hier yu holes'm the more yu air noticed."

BOARDING.

MRS. McKENZIE can accommodate a few permanent boarders; also, some daily boarders. Residence—Pharade Street, opposite the market. Belleville, Nov. 18, 1887. 170-4

store-keepers! Farmers! And Others! SHOULD BUY THEIR TEAS FROM THE IMPORTERS DIRECT.

The Montreal Tea Company, 6 Hospital Street, Montreal. HAVE sent over One Thousand packages to different parts of the country—and receive every day assurances that the Tea gives entire satisfaction.

Subjoined are a few of the numerous testimonials already received:

REVELL HOLT, Quebec, January 7, 1888. "The tea which I received from you is of fine quality and in good order. The quality is pure and excellent, and price cheap. As I am particular in having the best quality of tea, I feel that I can depend on your tea which gives great satisfaction. Yours obedient servant, WILLIS RUSSELL."

HOTCH OF SENATE, Ottawa, Dec. 18, 1887. "The tea which I received from you is of fine quality and in good order. The quality is pure and excellent, and price cheap. As I am particular in having the best quality of tea, I feel that I can depend on your tea which gives great satisfaction. Yours obedient servant, WILLIS RUSSELL."

JAMES LISTER, M.D., Belleville.

JAMES W. CARMAN, American Consul, Belleville.

BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 28, Consolidated Statutes of Canada, for the purpose of working the mineral veins upon sixteen acres of Lot No. 13, in the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession).

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and a crushing at Gilbert & Taylor's mill of four and one-half tons of the rock, gave a yield of over thirty dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—33 rods.

The territory is admirably suited for mining purposes, being a high ridge covered with indications of mineral veins. There are numerous places on the land fully as promising as the one on which the shaft has been sunk, and which would unquestionably yield as well. The large quantity of land, and the prospect of other gold-bearing veins, make it certain that the Company will be able to subdivide the property as soon as a little further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the mine, and the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the proprietary of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz master now in this country.

Work is being vigorously prosecuted in the mine, and the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the proprietary of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz master now in this country.

CAUTION.

THE perfection and cheapness of the AMERICAN WATCH, which has been found to be the most reliable and accurate time-keeper, is well known to all who have used it. It is so constructed that it will keep time for years without the necessity of winding, and it is so simple in its construction that it can be repaired by any one who understands the art. It is so cheap that it is within the reach of all, and it is so reliable that it is the only watch that can be trusted in any emergency. It is so perfect that it is the only watch that can be used in any climate, and it is so simple that it can be used by any one who understands the art. It is so cheap that it is within the reach of all, and it is so reliable that it is the only watch that can be trusted in any emergency. It is so perfect that it is the only watch that can be used in any climate, and it is so simple that it can be used by any one who understands the art.

The following are the two marks of the several grades of our manufacture:

AMERICAN WATCH CO.

APPLETON, TRACY & CO.

WALTHAM WATCH CO.

P. S. BARTLEY.

WM. BILLEY.

HOME WATCH CO.

PENNSYLVANIA RAILROAD COMPANY.

Office of the General Superintendent, Altoona, Pa., 16th Dec. 1886.

THE watches manufactured by you have been used on the Railroad for several years by our engineers, to whom we furnish watches as part of our equipment, and we have found them to be the most reliable and accurate time-keepers that we have ever used. We are therefore, in the highest degree, satisfied with the quality of your watches, and we are sure that they will be found to be the most reliable and accurate time-keepers that can be used in any emergency.

Respectfully,
EDWARD H. WILLIAMS,
General Superintendent.

American Watch Co., Waltham.

NEW YORK CENTRAL RAILROAD.

Locomotive Dept., Western Division, Rochester, N.Y., Dec. 24, 1886.

UNDER power of sale contained in a mortgage made the 28th day of October, 1883, between William Donovan, of Belleville, Grocer, and the Hon. John Ross, there will be sold for default of payment of mortgage money, on

Thursday, the 5th day of March, 1888, at TWELVE o'clock, NOON, by M. NULTY, at his auction rooms in the Town of Belleville, the following valuable property: Lot number eighteen, on the East side of Sidney Street, as laid down on a plan of survey of Lots numbers one and two, in the second Concession of the Township of Thurlow, in the County of Hastings, made by Henry A. F. McLeod, Esq., P. L. S., and registered in the Registry Office of the County of Hastings, on the 28th day of October, A. D. 1868.

The said lot number eighteen, contains ten acres of land more or less. It is fenced and otherwise improved.

For terms of sale and other particulars, enquire of JAMES ROSS, Esq., or of the undersigned.

ROSS, BELL & HOLDEN,

Attorneys for Hon. John Ross.

Belleville, 5th Feb., 1888.

837-4th

POSTPONEMENT.

THE above sale is postponed until THURSDAY, the 13th day of March, at the same time and place.

Epitaphs.

From an article on epitaphs we make a few extracts:

Perhaps the most absurd of all epitaphs is that attributed to a pyrochomist who died a few years ago. In the course of his travels he had been immensely struck by an inscription on the grave of the great musical composer, Purcell:

"He is gone where alone his melodies can be executed."

Piced by laudable ambition to secure such praise, Mr. B. requested that over his tomb might be written:

"He is gone where alone his fireworks can be executed."

Can anything be more simply touching than the third line of this triplet:

"Here he lay wrapped in clay
The body of William Wray,
—I have no more to say."

There is the grotesque intentional, and the grotesque unintentional. Among the former we should rank the epitaph of Mr. Poole, of Norwich:

"Here lies one Poole, whose death may thousands
For he hath now one foot within the grave."

And the one on Mr. Box:

"Here lies one Box within another,
The one of wood was very good,
We cannot say so much of Mr. Box."

The following must have been flatterings to the bereaved widower:

"Here lies the body of Mary Ford,
Whom soon we trust, to find abroad;
But if for hell she changed this word,
'Tis better than being John Ford's wife."

We wonder whether the old bachelor commemorated in the next would have indulged the epitaph for him:

"At three score winters' and I died,
A cheerless being, lone and sad;
The nuptial knot I never tied,
And valued my father never had."

Grammar is postponed in the next to high poetical and moral considerations:

"She's gone and cannot come to me,
But we will shortly go to her."

The following would be set down as Irish, but we believe may claim a Saxon origin:

"Ah, cruel death! Why so unkind,
To take her, and leave me behind;
Better to have taken both, or neither,
It would have been more kind to the survivor."

But of the following there can be no mistake:

"Under this stone lie two babes dear,
One is buried in Comagall, and the other here."

The monument—is it useful to say—is in Ireland, in Athlone churchyard.

The following is on a lady, possibly of those loquacious tendencies too often attributed to her sex:

"Here rests in silent clay,
Miss Anabella Young,
Who on the 21st of May,
Began to hold her tongue."

M. BOWELL,

INTELLIGENCER BUILDING,

Front Street, Belleville.

PROSPECTUS OF THE MOIRA GOLD MINING COMPANY.

Capital Stock, \$100,000. Divided into 10,000 Shares.

WORKING CAPITAL, \$15,000.

HORACE YEOMANS, Esq., President. ANDREW THOMSON, Esq., Treasurer.

B. S. GILBERT, Esq., Secretary. J. G. SHURTZ, Esq., Superintendent.

MERCHANTS' BANK, BANKERS. DEAN & GILBERT, SOLICITORS.

DIRECTORS:

HORACE YEOMANS, of Flint & Yeomans, Belleville.

ANDREW THOMSON, Banker, Belleville.

V. W. DEAN, Master in Chancery, Belleville.

JOHN G. SHURTZ, Superintendent.

JAMES LISTER, M.D., Belleville.

JAMES W. CARMAN, American, Consul, Belleville.

BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada,

for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession.)

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck of 18 inches in width, which at nine feet has increased to 24 feet, and a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of over fifty-one dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—52 rods.

The territory is admirably situated for mining purposes, being a high ridge covered with indications of mineral veins. There are numerous places on the land fully as promising as the one on which the shaft has been sunk, and the prospects of other gold-bearing veins, make it certain that the Company will be able to subdivide the property as soon as a title further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the proprietary of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz miner now in this country.

It is intended to lay further cranking in a few days, and negotiations are in progress which, if carried out, will secure a mill to the Company at once, so that regular work will be gone on with without delay, and dividends may, in that case, be expected in a short time.

Belleville, Jan. 27th, 1888.

CAUTION.

THE perfection and cheapness of the AMERICAN (WALTHAM) WATCH have given it such a wide world-wide celebrity that unscrupulous dealers have imitated the style and pressed it into trade marks. It is a fact that the American Watch is the only watch made in the United States, and its popularity is increasing rapidly. It is a fact that the American Watch is the only watch made in the United States, and its popularity is increasing rapidly. It is a fact that the American Watch is the only watch made in the United States, and its popularity is increasing rapidly.

SPECIAL NOTICES.

ALLEN'S LUNG BALSAM
Is warranted to break up the most troublesome Cough, is an incredible throat cure. There is no remedy that can show more evidence of its merit than this BAL- SAM, for curing Consumption, Croup, Colds, Asthma, Croup, etc.

Physicians having Conservative patients, and having failed to cure them by their own prescriptions, would not hesitate to prescribe this remedy, it has cured cases when all other remedies have failed.
Consumption, do not despair of cure, and all remedies that you have tried have failed, BUT TRY THIS GREAT REMEDY.

Sold by all Medicine Dealers.
Ferry Davis & Son, Montreal agents for the Dominion of Canada.
3-4w. 271-4w.

H. R. R.

The high prices emanating from people in all parts of the world that have derived benefit from the use of HADWAY'S REMEDY, prove their value to mankind. There is no pain or suffering, no inflammation, no swelling or soreness of the throat, no difficulty in swallowing, no loss of voice, no loss of sleep, no loss of appetite, no loss of strength, no loss of color, no loss of weight, no loss of life. Every one has heard of it, and tried it. Let those who have not used it, if it gives a trial. A few minutes will prove its power of stopping pain. Read the following letter. Any person doubting its truthfulness can write to the H. R. R. Co. and receive a full and true story of its power. For every word true we will pay One Hundred Dollars.
See Dr. Hadway's Address 190.

Remedy, Spitting of Blood, Difficult Breathing, Cough, Wonderful Cures on the National Guards of the Brazilian Army.

Rio De Janeiro, June 18th 1893.

Most Reverend C. LITTELL & Son.

Dear Sirs:—I am now eight years that I have suffered from Pneumonia, and have had the best doctors could not cure me. I was in bed for 100 days and all this time I spit blood and matter, but nothing would get me better. I made up my mind and let it all out, and was met by a friend, who recommended Dr. Hadway's Co's preparation.

After taking the first dose of Relief and water, I could breathe with ease, and felt all my pains diminishing. I continued to take the Hadway's Preparation, and half a teaspoonful of Relief and water, and also taking my share of food, and in ten days, I felt myself perfectly well. I only took ten bottles, and had three boxes of Pills. I hope that the authors of said preparations may have a long and prosperous life.

LET THERE BE HARMONY IN THINGS ESSENTIAL--LIBERality IN THINGS NOT ESSENTIAL--CHANGING W/ TIME

No. 279

An Irishman on Irish War

HE WOULD RATHER BE TAXED THAN SNEER
ED AT AS AN INFERIOR

Cornelius O'Dowd, in a contribution to *Blackwood*, expresses the following opinion of Irish wrongs and their remedies:—

A short time back the leading journal of England amused its readers by an article on our physical inferiority, and ingenious went on to show that most of our intellectual deficiencies might be ascribed to the fact I will not

We may be, though I don't believe it, a
that you say of us; but I am persuaded
one thing, which is, that without the alliance
we contribute to the national character you
would be far less efficient at home

much less liked abroad. It is a sore trial, a quick man's temper to be sneered at by a slow fellow; and this is what Ireland feels and has long felt. You may be our superiors in skill, in industry, in aptitude for the mechanical arts, and in many other

by which men make money; but somehow we have a habit of thinking that when we meet you on some point,

Old World or the New, we are not afraid of the competition. Of course it is utter nonsense to talk of an oppressed and enslaved Ireland as Poland, and to talk of our wrongs as comparable with those of

oppressed and enslaved people. I never
met the man who believed this. I have
not seen many who were able to utter this
sentiment without a laugh. But we cer-
tainly do not laugh at your wholesale con-
fidence of us as a disloyal people, and

not less wholesale sneer at us as an inferior race. You are not always conscious of the affronts you pass upon us. You have been so long trained to regard us as beneath you that you are rather vain than otherwise.

though you do not always apply the phrase. We are mere Irish at this day, as we were four centuries ago. If the insulting estimate you form of us were only to be found in your little-educated, little-civilized

classes, it might be more supportable, but this is not the case. Your best writers and newspapers abound with reviews and it is but a few years back your protested against an Irishman being raised

to the Mastership of the Rolls in England though that Irishman was Lord Plunket. Now for my own part, I'd rather you visit me with some unjust piece of legislation, refuse me some privilege, or deny some right, than I'd be perpetually treated

You are always talking of your Ir difficulty, but forget how much of it your own making. ^A Begin the redress

our grievances by condescending to believe that only a portion of Ireland—and I believe a small portion—is Fenian. Discontent, I know, is broadcast; and Fenianism can count upon this discontent to swell processions on field days just as Bea-

and Co. can count upon the unemployed ruffianism of London to muster strong Hyde-park. Of all the easy things the easiest is to get up a demonstration against the government of any country where

laws are mild enough to permit the indulgence; but it would be very rash to conclude that the people who assemble on these occasions carried their sympathies beyond the pleasure of being in a crowd and hearing their sweet voices in cho-

with others of their species. If to pacify Ireland, and make her governable, you must confiscate the property of the landlords, and beggar the gentry, as much suggested by the member for Lambeth,

others, perhaps it would be not less polite and something more humane, to give the country over to the Fenians at once, and leave what was wont to be well affected England to make terms with the new rule.

For my own part I declare frankly rather live under King O'Donoghue than be legislated for by John Bright. I do not believe a greater misfortune could befall Ireland than to become the battle-field between contending parties in the state.

and to this there is every likelihood that the next session of Parliament will bring us. I do not to say that your present panic in England will scarcely enable you to weigh the Irish questions with that equanimity justified by the facts.

demands, nor bestow on Irish questions that amount of kindness which in your calmer moments you have never denied them. Up to this your system has been to think too much of concessions to the millions, and too little—far too little—of the

dealing with the men who preserved the discipline; and you are even now spurred on as you were by the language of trade unions and reform leagues, and that austere spirit of "bidding" for office—even now you are not unlikely only to think of the

disloyal, and frame all your legislation for the benefit of the traitor, and think little of the fealty that you well know has never wavered. This game may be played to far.

A dilapidated old daykey in Mon
gomery, while watching the monkeys in
menagerie in that city, spoke thusly
"them children got to much sence to com

HE WOULD RATHER BE TAKEN THAN SNEER
ED AT AS AN INFERIOR

Cornelius O'Dowd, in a contribution to *Blackwood*, expresses the following opinion of Irish wrongs and their remedies:—

A short time back the leading journal of England amused its readers by an article on our physical inferiority, and ingeniously went on to show that most of our intellectual deficiencies might be ascribed to the fact I will not

We may be, though I don't believe it, that you say of us; but I am persuaded that one thing, which is, that without the all we contribute to the national character you would be far less efficient at home, and much less liked abroad. It is a sore trial to a quick man's temper to be snubbed at by a slow fellow; and this is what Ireland feels and has long felt. You may be our superiors in skill, in industry, in aptitude to the mechanical arts, and in scores of things by which men make money; but somehow we have a habit of thinking that when we meet you on your own ground, we are

Old World or the New, we are not afraid of the competitiveness. Of course it is utter nonsense to talk of an oppressed and enslaved Ireland as Poland, and to talk of our wrongs as comparable with those of the oppressed and enslaved people. I have met the man who believed this. I have not seen many who were able to utter this sentiment without a laugh. But we certainly do not laugh at your wholesale assurance of us as a disloyal people, and you are not less wholesale sneer at us as an inferior race. You are not always conscious of your affronts to your readers. You are not

so long trained to regard us as beneath you that you are rather vain than otherwise in the consideration you bestow upon us, although you do not always apply the phrase. We are mere Irish at this day, as we were four centuries ago. If the insulting estimate you form of us were only to be found in your little-educated, little-civilized classes, it might be more supportable, but this is not the case. Your best writers, reviews and newspapers abound with it and it is but a few years back your Irish protested against an Irishman being raised to the rank of a peer.

You are always talking of your Irish difficulty, but forget how much of it is your own making. 'A Begin the redress of our grievances by condescending to believe that only a portion of Ireland—and I believe a small portion—is: Fenian. Discard

ment, I know, is broadcast ; and Fenianism can count upon this discontent to swell its processions on field days, just as Beaumont and Co. can count upon the unemployed ruffianism of London to muster strong in Hyde-park. Of all the easy things to do, the easiest is to get up a demonstration against the government of any country where the laws are mild enough to permit the individual ; but it would be very rash to conclude that the people who assemble on these occasions carried their sympathies beyond the pleasure of being in a crowd and hearing their sweet voices in chorus.

with others of their species. If to pass Ireland, and make her governable, we must confiscate the property of the landlords, and beggar the gentry, as milne suggested by the member for Lambeth, insult the loyalty of Ulster, as hinted at by others, perhaps it would be not less politic and something more humane, to give the country over to the Fenians at once, and leave what was wont to be well affected to England to make terms with the new rulers. For my own part I declare frankly rather live under King O'Donoghue than I'd be legislated for by John Bright. I

not believe a greater misfortune could befall Ireland than to become the battle-field between contending parties in the state; and to this there is every likelihood the next session of Parliament will bring us; not to say that your present paucity in England will scarcely enable you to well Irish questions with that equanimity Justice demands, nor bestow on Irish questions that amount of kindness which in your calmer moments you have never denied them. Up to this your system has been to think too much of concessions to the numerous, and too little—far too little—of Irish decay; and the man who preserved the

LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL

No. 280.

Topological

One of the finest specimens of the high-flown style that has lately come under our notice, is furnished by the *Mobile Tribune*, in the following outburst concerning immigrants:

"There is a sulphurous volcanic cloud rising over the Northern land; and by the lurid light that gleams along its borders we see houses in flames, and fields desolated, and outraged women flying with dishevelled hair to hide their shame, and mastless hulks with blood-stained decks drifting rudderless on seas whitened no more forever with the canvass wings of commerce, and cities of the dead whose mouldering ruins

would topple over and fall with the jar upon the air of a single footstep upon their sidewalks, but the footstep is not there. — "Impeachment is peace!" It is the sort of peace Satan brought into the Garden of Eden, when he made Adam impeach Eve before the Most High. Impeachment is not peace. It is simply turning on the gas that is manufactured in hell; it is putting the door ajar for the entrance of the troop of horrors we have pictured above. — Impeachment of the President by Rumpian

Barebones Robespierres, for adherence to the Constitution he had sworn to support, is a certain sign that government is gone and anarchy has begun, as the sinking of the sun behind the western hills is a sign that the day has gone and night is coming. "Impeachment is peace." Then peace is hell upon earth."

Ingrowing Toe Nail.

Dr. Bailey, in the *Leavenworth Medical Journal*, suggests that the following method of healing this annoying deformity:

I have found that the *second toe* always presses against, and rather beneath, the side of the great toe, which very naturally produces the whole trouble. It has occurred to me, therefore, that if this constant

cause could be dispensed with, and at the same time pressure applied in such a manner as to press the flesh away from the nail, a permanent cure could be effected without the use of the knife, which is justly dreaded by the patient. To accomplish this, I got up a bandage, by taking a piece of strong muslin about one inch wide and

just long enough to make two loops (by sewing), one large enough to slip over the great toe, and the other to slip over the third toe, and bring them close together, letting the second toe rest over or above the bandage, where it furnishes precisely the required pressure to crowd the soft parts away from the nail, and at the same time the pressure that caused the disease.

In the few cases that I have used this simple appliance it has been followed with complete success. It is convenient, not troublesome to apply, and can be worn without dispensing with ordinarily tight boots or shoes, which is sometimes quite an important thing, especially if the patient is a lady.

An exhorter at a revival meeting became rather indignant because a brother was his superior in singing, and said: "Brother—can sing and pray; but, by the blessing of

God, there is one thing I can beat him at—
—I can fiddle his shirt off.”

The needle-point in the seaman's compass never stands still, but quivers and shakes till it comes right against the North pole. The wise men of the east never stood still till they were right against the star which appeared unto them; and the star itself never stood still till it came right against

the other Star, which shone more brightly in the manger than the sun did in the firmament. And Noah's dove could find no rest for the sole of her foot all the while she was fluttering over the flood, till she returned to the ark with an olive branch in her mouth. So the heart of every true Christian, which is the turtle dove of Christ, can find no rest all the while it is

EMIGRATION.—The Government emigration officers at Liverpool have completed their collection returning from the Mersey for

the year ending December 31st, and a glance over the following figures shows that the Irish element still prevails both as regards the United States, Canada, South America and Australia. The exodus, though not so great as last year, from the Mursey, is accounted for by the fact that several additional steamships now call at Queenstown, and emigrants who formerly

embarked at Liverpool go on board at Queenston, and therefore save expense and escape the discomfort of a channel passage. When compared with former years, says an English paper, it is a remarkable fact that the Irish were far better clothed and provided for than either the English or foreigners. Probably remittances from the new help to cover the wants of those in

the old world. There was a falling
1,410 in January, as compared with the
same month in the previous year, and the
emigration in 561 ships was 115,681—a
decrease of 7,702 since 1886.

How to keep Eggs.

The following is the conclusion of an article from our sailor correspondent: But going in stays on the port tack, I want to tell you of my latest egg observation. During this last four months' voyage, the week before the start of the season, I gathered fifty dozen eggs for cabin sea stores, and found it quite a task to prove every egg of good quality; besides I got them from sea-faring friends, and knew that they were fresh laid. Then I fixed them for keeping, by taking five or six dozen at a time, and dipping them in a solution of sugar-water. After salting, I passed the egg through a bath made by dissolving about five pounds of the cheapest brown sugar in a gallon of water, and laid them on the galley floor to dry. There I had my assistant, a sugar-coated.

I packed them in charcoal dust instead of sawdust, and after a week, I found the eggs perfectly fresh. I thought three—not absolutely spoiled; but a little like—All the while, or what was left of them, were as fresh when we came in the Cape, as the day they were laid. I packed them away on New Year's day.

I made a discovery—new to me, however. Perhaps it may be to others—possibly worth something.

Ever since we began to have fancy fowls and buff eggs, I had noticed that the first to fall were the new color, and finally that where an egg is spoiled, the yolk has settled through the albumen, and adhesion to the shell. So, on the voyage, I have been extremely particular. The result I have found is that the density of the albumen in the white shell egg always considerably greater than in the buff ones, while the specific gravity of the yolk was several percent less. So the conclusion was, and is, that the yolk of a yellow egg settles somewhat through the albumen, comes in contact with the shell, and consequently the air, and the buff egg soon spoils—Country Gentlemen.

JAMES LISTER, M.D., Belleville.

JAMES W. CARMAN, American, Consul, Belleville.

BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada, for the purpose of working the mineral veins upon fifteen acres of Lot No. 19, in the fifth concession of Madoc, (the Richardson Mine being No. 13 in the same concession).

A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck, of 18 inches in width, which at nine feet has increased to 24 feet, and a crumbing at Gilbert & Taylor's mill of four and one-half tons of the rock, gave a yield of over fifty-one dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—53 rods.

The territory is admirably situated for mining purposes, being a high ridge covered with indications of mineral value. There are numerous lodes on the land fully as promising as the one on which the shaft has been sunk, and which would unquestionably yield as well. The large quantity of land, and the prospects of other gold-bearing veins, make certain that the company will be able to subdivide the property as soon as a title further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in the shaft, under the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the property of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished expert now in this country.

It is intended to have further crumbing in a few days, and negotiations are in progress which, if carried out, will secure a mill to the Company at once, so that regular work will be gone on with without delay, and dividends may, in that case, be expected in a short time.

LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL.

No. 281.

DOMINION PARLIAMENT.

THURSDAY, March 26, 1868.

In the Senate, in answer to Senator Ryan, Senator Campbell said that the Government of the Dominion had placed the

In answer to Senator Dickey, Senator Campbell said the Government did not intend to introduce a measure for the postponement or abolition of the duty on newspapers.

In reply to Mr. Chamberlin, Mr. Cartier said it was not the intention of the Government, during the present Session, to make

In reply to Mr. Gibbs, Mr. Rose said that

question of assimilating the laws of the several provinces of the Dominion with regard to the inspection of wheat and flour was engaging the attention of the Government.

Government. In Canada inspection was not compulsory, while at Halifax and St. John it was compulsory, and it was desirable, that it should be made uniform. But he might remark that the Canadian

Inspection of flour stood well in all parts of the world, and would no doubt be accepted in the lower Provinces.

was the intention of the government in the currency bill to take the power to make American silver a legal tender up to a certain amount at such rate as the Government

Mr. Magill enquired whether it was the intention of the government to require uniform gauges in the construction of

railways hereafter to be constructed in the Dominion; also, whether the local government of Ontario has not exceeded its authority in chartering a line of railway competi-

M. Cartier said the bill he had introduced would state the policy of the government

with regard to the gauge of railways to be incorporated by the parliament of Canada. Whether the Legislature of Ontario has exceeded its authority in any instance was

a legal question which could only be determined when the question was raised to disallowing any of its acts.

so soon as the Government was possessed of the great North-west territory it would not lose a moment in doing all in its power to settle the country.

* In reply to Mr. McConkey, M. Cartier said the question of the distribution of the statutes among the magistracy, etc., was now engaging the attention of the Government.

In reply to M. Cheval, Mr. Rose said the Government had no power to compel the banks to withdraw from circulation the

copper coin issued by them. This coin was a claim in the hands of the holder against the banks which issued it.

when the policy of the Government with respect to trade was brought down to the question as to the imposition of tonnage dues on American vessels trading to Canada.

dian ports, equal to the tonnage now imposed on Canadian vessels trading American ports, would come up for consideration.

Mr. Oliver moved for copies of the orders made to the government relative to the building of the Intercolonial Railway, moving the resolution he alluded to in the

reports that had been current about certain parties having offered to build the road to the frontier and northern routes. He said the Province of Ontario was greatly interested in this as a money question and

one route was as good as another, in a military point of view, that should be built, which offered the best chance of proving commercially profitable.

Mr. Cartier said he had no objection to the motion. The government had called for any tender, but certain gentlemen in different parts of the Dominion

had taken upon themselves to send tenders to the government. These tenders would be forthcoming. In regard to the route was a subject which was still under the

consideration of the government and the
would not therefore take any part in the
discussion upon it in this House.

Mr. Holton asked if the report was true

that the Minister of Public Works had gone to Montreal in February last, and put himself in communication with certain capitalists there, with a view to induce them to build the interprovincial line.

make an offer to build the intercolonial railway on the frontier route from Rivière du Loup. He (Mr. Holton) alluded to the premier's statement the other day that there was a majority and a majority in the cabinet.

inlet on this question, and said it was a extraordinary thing in a constitutional government to see one section of the cabinet advocating one route, and another section

M. Cartier said he was not bound to answer the member for Chateaugay whether one of his colleagues had gone to Montreal by another route.

Mr. Holton said that as the Minister o

A PATENT WAY TO SETTLE THE ALABAMA CLAIM.—Submitted to the Hon. W. H. Smith, Mr. Editor, I am tired to death of hearing that stupid Alabama question, which I could settle in two minutes. But men are so conceited, my husband, now, in his party stage, that the following suggestion is all but impossible to send to him. I know, I know, the whole thing lies in an nutshell. Mr. Hepworth Dixon says in an nutshell, that in the United States extra young ladies, in the United States are approximately 750,000 young men long-forever for wives. Then let Mr. Seward send over 365,000 of these young men. For the credit of his country, of course, he would pick out the handsomest and the best. Let them wear 800,000 of our dresses, and let generous England give the brides—with her blessing—to America, in full satisfaction of the Alabama claims. Fancy making 855,000 young couples out of a coup. Would not our negotiations go as "merely as a marriage bell" after that? I do not suppose we should have the heart to quarrel with Americans again, when our own darling grandchildren were carrying off the prizes at their baby shows! Bless their little hearts, what pretty Anglo-Yankees they would be! I remain, Mr. Editor, A MATCHMAKER, on amors.

P. S.—On second thoughts, the 750,000 had better come, as Scotland and Ireland would wish no doubt, to share in making compensation.

EPISCOPAL WRIT.—*Excerpts from the Globe* say when some young and notable clergyman expressed a wish, in the presence of the Bishop of Exeter, that there were preachers in the Church of England as eloquent as Spurgeon, the prelate duly remarked, "Thou shalt not call thy neighbor's ass." The paper from which we quote irreverently adds, that if Episcopal development continues, there will be no need for such courtesies.

An extraordinary tragedy has lately been enacted at Tottenham, England. The Rev. Mr. Ploie, Mr. Ploie, and several of his servants were attacked during the night of the 2nd instant, by a tutor of one of the maid servants, who had been discharged on account of his wife. He was armed with a pistol and an axe, killed one of the servants on the spot and inflicted such dangerous wounds upon Mr. and Mrs. Ploie that they are not expected to recover.

Store-keepers! Farmers! And Others! SHOULD BUY THEIR TEA FROM THE IMPORTERS DIRECT.

The Montreal Tea Company, 6 Hospital Street, Montreal, HAVE sent over One Thousand Packages to different parts of the country—and receive every day assurances that the Tea gives entire satisfaction.

Subjoined are a few of the numerous testimonials already received:

Montreal Tea Company, Quebec, January 1, 1868. "GENTLEMEN:—The sachets of Tea forwarded some time since to me, and which I have used, are as good as any I have ever used. And, in particular, I have found the sachets of Tea to be of great value in the treatment of my cold. I am, Sir, your obedient servant, WILLIS RUSSELL."

Montreal Tea Company, Ottawa, Dec. 16, 1867. "GENTLEMEN:—I am of English descent and Young Hyson Tea which you sent me gives great satisfaction. You may expect my future order, Yours, S. SKINNER."

Montreal Tea Company, Quebec, December 18, 1867. "GENTLEMEN:—The box of 10 lbs. English Breakfast Tea which you sent me, I have used, and I find it as good as any I have ever used. I am, Sir, your obedient servant, JOHN T. DAY."

Montreal Tea Company, Montreal, December 22, 1867. "GENTLEMEN:—I have used the Tea which you sent me, and I find it as good as any I have ever used. I am, Sir, your obedient servant, JOHN T. DAY."

Montreal Tea Company, Montreal, December 22, 1867. "GENTLEMEN:—I have used the Tea which you sent me, and I find it as good as any I have ever used. I am, Sir, your obedient servant, JOHN T. DAY."

PROSPECTUS OF THE MOIRA GOLD MINING COMPANY.

Capital Stock, \$100,000. Divided into 10,000 Shares. WORKING CAPITAL, \$15,000.

HORACE YEOMANS, Esq., President. ANDREW THOMSON, Esq., Treasurer. B. S. GILBERT, Esq., Secretary. J. G. SHURTZ, Esq., Superintendent. MERCHANTS' BANK, BANKERS. DEAN & GILBERT, SOLICITORS.

DIRECTORS: HORACE YEOMANS, of Flint & Yeomans, Belleville. ANDREW THOMSON, Banker, Belleville. W. W. DEAN, Master in Chancery, Belleville. JOHN G. SHURTZ, Superintendent. JAMES LINTER, M.D., Belleville. JAMES W. CARMAN, American Consul, Belleville. BARTON S. GILBERT, of Dean & Gilbert, Barristers, Belleville.

THIS COMPANY is duly incorporated under Cap. 23, Consolidated Statutes of Canada, for the purpose of working the mineral veins upon sixteen acres of Lot No. 19, in the fifth concession of Madoc, (the Richardson Mine being No. 18 in the same concession). A shaft has been sunk to the depth of nine feet in the rock. At six feet a gold-bearing lode was struck, of 15 inches in width, which at nine feet has increased to 25 feet, and a crushing at Gilbert & Turley's mill of four and one-half tons of the rock, gave a yield of over fifty-six dollars in gold; the lode is clearly defined, and evidently extends the whole length of the property—39 rods.

The territory is admirably situated for mining purposes, being a high ridge covered with indications of mineral veins. There are numerous places on the land fully as promising as the one on which the shaft has been sunk, and which would unquestionably yield as well. The large quantity of lead, and the prospect of other gold-bearing veins, make it certain that the Company will be able to subdivide the property as soon as a little further development has been made, and form other Companies at great advantage.

Work is being vigorously prosecuted in this mine, under the superintendence of JOHN G. SHURTZ, Esq., one of the Directors, who is largely interested in the property, of the mine, and who has had thirteen years' practical experience in the gold mines of California and Nevada, and is unquestionably the most accomplished quartz miner now in this country. It is intended to have a further crushing in a few days, and negotiations are in progress which, if carried out, will secure a mill to the Company at once, so that regular work will be going on without delay, and dividends may, in that case, be expected in a short time.

Belleville, Jan. 27th, 1868. 2283-1

India and China Tea Company.

CAUTION.

THE reputation and cheapness of the AMERICAN WATCHES have given them such a wide sale, that many persons have been induced to imitate its style and printed its trade marks. It is to be regretted that these imitations are occasionally found, and when caught for genuine, are sold at a low price. The several grades of the American Watches are as follows:—The first grade is the American Watch Co. of New York, the second is the American Watch Co. of New York, the third is the American Watch Co. of New York, the fourth is the American Watch Co. of New York, the fifth is the American Watch Co. of New York, the sixth is the American Watch Co. of New York, the seventh is the American Watch Co. of New York, the eighth is the American Watch Co. of New York, the ninth is the American Watch Co. of New York, the tenth is the American Watch Co. of New York, the eleventh is the American Watch Co. of New York, the twelfth is the American Watch Co. of New York, the thirteenth is the American Watch Co. of New York, the fourteenth is the American Watch Co. of New York, the fifteenth is the American Watch Co. of New York, the sixteenth is the American Watch Co. of New York, the seventeenth is the American Watch Co. of New York, the eighteenth is the American Watch Co. of New York, the nineteenth is the American Watch Co. of New York, the twentieth is the American Watch Co. of New York, the twenty-first is the American Watch Co. of New York, the twenty-second is the American Watch Co. of New York, the twenty-third is the American Watch Co. of New York, the twenty-fourth is the American Watch Co. of New York, the twenty-fifth is the American Watch Co. of New York, the twenty-sixth is the American Watch Co. of New York, the twenty-seventh is the American Watch Co. of New York, the twenty-eighth is the American Watch Co. of New York, the twenty-ninth is the American Watch Co. of New York, the thirtieth is the American Watch Co. of New York, the thirty-first is the American Watch Co. of New York, the thirty-second is the American Watch Co. of New York, the thirty-third is the American Watch Co. of New York, the thirty-fourth is the American Watch Co. of New York, the thirty-fifth is the American Watch Co. of New York, the thirty-sixth is the American Watch Co. of New York, the thirty-seventh is the American Watch Co. of New York, the thirty-eighth is the American Watch Co. of New York, the thirty-ninth is the American Watch Co. of New York, the ville.

BILL HEADS.
A. cited with soldiers and dispatch at the
INTELLIGENCE Office Front Street, Bellefleur.

British Gans.

The accuracy and mobility of our English
big guns have been lately demonstrated to
perfection by an experiment at Shoebury-
ness. The running deer target is five foot
square, and travels upon wheels. At a
narrow range of 1,000 yards the apparent
size of the deer is very small, and seems
almost nothing compared with the sights
of a heavy piece of ordnance; and when
the nine-inch gun was "placed in position
to shoot at this mark,"—a, dragged
rapidly along by a team of horses—there
seemed little probability that even one out
of a battery of ten rounds could possibly strike it.
I should like to ask for guesses as to the
time required to fire ten projectiles weigh-
ing 250lb. each from a 13-ton gun. The
actual case was this:—Ten rounds were
fired at the moving target in eight-and-a-
half minutes, two of the ten struck it, and
the rest dropped close by. The range was
known, but so would the range of any
ship or boat be known if it passed near one
of our sea forts, because all sorts of sci-
entific appliances would be employed to
ascertain it with certainty. In eight min-
utes and a half, therefore, or let us say ten
minutes, a small gunboat would have been
hit ten times by a single gun. A battery
of ten guns would have struck the gunboat
100 times in ten minutes. When the
evidence laid before a late military com-
mittee is published, the little "army"
men may say of their chances of striking a
battery. The captain of the Minotaur
was asked, when in England, what would
be the result if his ship was lying opposite
Gibraltar, and plunging about with the shore.
"If I thought for a moment that they
might fire at me, I guess I'd soon show
them a clean pair of heels."—*Once a Week.*

The Jersey City Exiles.

The excitement in regard to the trouble
between Mr. Drew and Commodore Van-
derbilt is unabated. While Wall St. is as
usual in high fever, the little "army"
men are intensely agitated. Taylor's
Hotel is now the castle of one of the rail-
road kings and in Dudley S. Gregory's
monstrous fire-proof building, the massive
treasure of a wealthy corporation. A few
days ago it was reported that a raid was
about to be made upon the citadel, and
that Daniel Drew and his garrison were to
be innocently gobbled up, victim, re-
leased from their pleasant place of voluntary
exile, and led by force across the placid
Hudson even unto the city of Gotham, there
to be mutilated in certain stunts for the
alleged infraction of a law and sundry
laws of our good commonwealth. This
report proved to be a false one. Yester-
day, however, there came to Messrs. Drew,
Fisk, Eldridge, and Gold more authentic
information touching a contemplated in-
surrection under the leadership of two well-known
men of might and muscle employed for the
purpose herein before hinted at. Long
before the hour arrived for the departure
of the hostile band from the bitter side of
Hudson, units of steam, a round score of
Jersey City's guardians were quietly sta-
tioned in the halls and corridors of Taylor's
inn, their locust claws well polished and
trim resting within easy reach of broad
right hands. The little "army" men, and
their bright haired repeaters awaiting only
the signal to belch forth their sulphurous
protest against the invasion of the bastion
which owe allegiance to the monopolies
of Camden and Amboy. A score or two of
of Erie Railway men, and in all possible ways
make their new life as pleasant and com-
fortable as it is in the power of expatriated
men to make it.— *Tribune.*

"Are you not alarmed at the approach
of the King of Terrors?" said a minister
to a sick man. "Oh, no; I have been living
six and thirty years with the queen of ter-
rors—the King cannot be much worse."

"Haven't you?" Did you attend church
to-day?" "No, I was in the slave-lane."
"Barth, sir," was the reply. "What
stories were they?" "Why, he tell the
people, do man can serve two masters;
I own, do de fus story, kase you see once
massa John, Dem de prescher says he will
bete de one and de de odder, while de
Lord knows how I betted you bet!"
